PURPOSE

This course is designed to bring together the art and science of esthetic, restorative, and implant dentistry and will focus on many of the clinical issues we deal with every day. Diagnosis, treatment planning, materials selection, and techniques will be incorporated. Criteria for selection of clinical materials and proven techniques will be discussed based on clinical science, not on manufacturer’s claims. Additionally, best techniques for dentist laboratory communication will be discussed to enhance clinical results. Lastly, strategies and techniques for implant utilization in a general practice to increase predictability, simplify processes, and enhance outcomes will be highlighted. Many cases will be shown and discussed, ranging from simple to complex, giving the participant more confidence in treating their own cases and improving the delivery of patient care and satisfaction.

OBJECTIVES

At the completion of this course, participants should be able to:

• Review physical properties for all-ceramic materials with particular emphasis on what most frequently leads to failure
• Determine the most appropriate restorative material and design for each clinical situation
• Recognize the clinical situations where traditional restorations may still be the best option
• Discuss how the esthetic components of shade and translucency are created with today’s all-ceramic materials
• Review the critical information that should be transferred to the dental laboratory for the most predictable results
• Confidently establish methods to communicate critical information to the dental laboratory
• Review practical and predictable strategies for immediate provisionalization
• Affect esthetic success in an implant supported restoration
• Effectively integrate implants into the comprehensive rehabilitation
• Review concepts for phasing the long term or transitional rehabilitation
• Outline the pros and cons of screw retained vs. cemented restorations
• Identify abutment design parameters.

SPECIAL NEEDS

The Division of Professional and Community Education at Augusta University complies with the Americans With Disabilities Act. If you require special services, facilities, or dietary considerations (vegetarian or otherwise) to support your participation in this continuing education program, please notify the conference coordinator before the course at 800-221-6437 or 706-721 3967.
REGISTRATION

Please see Registration Form for schedule of Fees. The registration fee, less a $125 administrative charge, is refundable if notice of cancellation is received by Friday, May 12, 2017.

*Augusta University is not responsible for any circumstance making it impossible to attend their continuing education courses due to acts of God, war, government regulations, disaster, strikes, civil disorder or curtailment of transportation facilities. If Augusta University cancels a continuing education activity you will be refunded your registration fee.*

LOCATION AND LODGING

Located on the shores of the Atlantic Ocean in a lush, subtropical setting, Hilton Head Island offers a unique blend of unspoiled, natural beauty complemented by first-class amenities and activities. Visitors can enjoy miles of wide sandy beach, ideal for sailing, cycling, and strolling. Sports enthusiasts will find the perfect setting for outdoor activities including golf and tennis. The island has 21 championship golf courses and 200 tennis courts. Shopping also abounds with more than 100 outlet stores. Equally enticing, the historic cities of Beaufort and Savannah are just 45 minutes away.

**Omni Hilton Head Oceanfront Resort**
This oceanfront paradise is a perfect getaway. Lush, meandering gardens surrounded by peaceful lagoons are the ideal setting to relax and unwind. Three miles of white sandy beaches are at your doorstep.

Reservations can be made by individuals calling Central Reservations at 800-843-6664. Attendees must refer to “Augusta University Clinical Advances Dental Program.” **Reservations must be received on or before April 28, 2017.**

*After this date, rooms are available on a space and rate availability basis only.*

TARGET AUDIENCE

Dentists, auxiliaries, other dental professionals

COMFORT ZONE

Although every effort is made to have a comfortable temperature in the meeting room, we realize everyone’s comfort zone is different. Please bring a jacket or light wrap in case the room is too cool for your comfort.

James Kessler, DDS, CDT, is a 1977 graduate of the University of Oklahoma College of Dentistry. Jim spent 20 years in private practice in Tulsa, Oklahoma and eighteen years in full time dental education. During his years in education, he taught at the Medical University of South Carolina, the University of Oklahoma, and served as the Chairman of the Department of Education at the Pankey Institute for Advanced Dental Education in Key Biscayne, Florida. In September 2012, Jim returned to the University of Oklahoma to direct the newly established Advanced Esthetics and Technologies Program. Jim was honored as the 1987 and 2011 Alumnus of the Year for the University of Oklahoma College of Dentistry and is a Past-President of the American Academy of Restorative Dentistry. Upon his retirement from full time dental education, he established a one-person dental laboratory, High Country Dental Arts Laboratory, near his home in Colorado. When he is not teaching, he works as the only technician in this lab. He has published many articles, as well as contributions to four textbooks including the most recent fourth edition of *Shillingburg’s Fundamentals of Fixed Prosthodontics*. Jim enjoys producing technical illustrations and creates all of the illustrations utilized in his presentations. He is an active lecturer for both Dentists and Dental Laboratory Technician groups and has presented over 500 lectures throughout the United States as well as Canada, Europe and Asia.

Barry D. Hammond, DMD, Course Director, earned his dental degree from the Medical University of South Carolina and completed a general practice residency in Chapel Hill, N.C. He maintained a private practice for 15 years, emphasizing restorative and esthetic dentistry. Dr. Hammond is an L.D. Pankey Institute alumnus and taught for several years with the Ross Nash Institute for Dental Learning in Charlotte, N.C. He joined the AU faculty in 2006 and is an Associate Professor in the Department of General Dentistry and serves as the Director of Dental Continuing Education for The Dental College of Georgia at Augusta University.

Brad Hall, DMD, is a graduate of the Medical College of Georgia School of Dentistry. Following graduation and completion of the MCG General Practice Residency, he accepted a position as the assistant director of the same residency program and served in that capacity until the summer of 2006. He is currently in private practice in Athens, GA, but retains an adjunct faculty position at The Dental College of Georgia at Augusta University in the pediatric dental department. Dr. Hall’s clinical interests include dental implants, IV sedation, care of the medically compromised patient and hospital dentistry. Dr. Hall remains active in dental education and has had the privilege of lecturing on various topics related to implant dentistry.
Today we are in the midst of one of the most exciting, yet confusing times that modern dentistry has ever experienced. There are proven restorative materials whose preparation requirements, fabrication techniques, and functional predictability are very familiar to dentists and dental laboratory technicians. At the same time, there is a barrage of information, often commercially biased, to sort through regarding new materials and technologies. In this presentation, we will examine the advertising hype associated with the “hot” new materials, and evaluate how they compare with traditional materials and proven principles both positively and negatively.

In this presentation, we will discuss how a given shade is achieved with various all-ceramic materials and with different restoration designs such as veneers vs. full coverage or layered vs. monolithic. There are a number of simple pieces of information that can be transferred from the operatory to the laboratory that will make tremendous improvements in the final result and make for incredibly predictable delivery appointments. These communications do not require special equipment, nor are they time consuming, and they can be easily implemented immediately into one’s practice activities.
Monday, May 29, 2017

7:15 a.m.  Continental Breakfast
7:45 a.m.  The Dental Implant in Practice: Concepts for Restorative Success – Dr. Hall
           The dental implant is an indispensable tool in any comprehensive restorative practice. However, without thoughtful application, this asset can quickly become a liability for patient and clinician. This course will highlight strategies and techniques for implant utilization in a general practice to increase predictability, simplify processes, and enhance outcomes.

9:45 a.m.  BREAK (please check out of resort at this time)
10:00 a.m. The Dental Implant in Practice: Concepts for Restorative Success (continued)

11:45 a.m. Questions and Answers
12 noon   Adjourn

CREDIT

The Dental College of Georgia at Augusta University is an ADA CERP Recognized Provider.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/cerp

The Dental College of Georgia at Augusta University designates this activity for 12.25 continuing education credits. 01/01/14 – 12/31/17. The formal continuing education programs of this program provider are accepted by AGD for Fellowship/Mastership credit. The current term of acceptance extends from 01/01/14 – 12/31/17.
