Drawing on Teeth

1. Click to select tooth
2. Right click and choose *Tooth Details*
3. In *Detail Tooth* window, uncheck *Enabled*
4. Rotate tooth until relevant surface is facing you
5. Select drawing color from drop-down window
6. Recheck *Enabled*
7. Select *Paint* to draw
8. Select Single to draw lines
9. To color a rectangular shape, choose *Selection*
10. When done, click OK and tooth will appear in original position with drawing added

The easiest way to erase is to select *Erase* and *Selection*
