Georgia Regents University and East Central Regional Hospital have been working together since 2009 to develop and grow the first partnership between a state psychiatric hospital and a comprehensive research university and academic health center in Georgia. The model will receive statewide and perhaps even national attention as other public hospitals look for ways to improve delivery of services. You can be a part of the exciting opportunity to make a difference.

East Central Regional Hospital is a state operated facility with two campuses. The Augusta campus is a psychiatric hospital that provides care to people with severe and persistent mental illness. The Augusta campus also provides Forensic services. There are treatment units and malls, activity areas, administrative and support buildings on a 310 acre campus. The Gracewood campus is an ICF/MR and Skilled Nursing Facility (SNF) that provides care and services to individuals with intellectual and developmental disabilities. Gracewood consists of living areas, activity areas, administrative and support buildings spread over a 420 acre campus.

ECRH will provide you with the opportunity to work in a variety of areas including crisis evaluation, acute and long term mental health, forensic services and intellectual/developmental disabilities. Both Georgia Regents University and East Central Regional Hospital are focused on a long term relationship; both committed to the success of the affiliation and see it as win-win, benefiting GRU, ECRH, the community, and the individuals we serve. We are currently hiring for:

- Staff nurses
- Charge nurses
- Management level nursing positions

As a GRU employee you will provide patient care services at ECRH while benefiting from the programs and services of a comprehensive research university and academic health center. If you would like to learn more about the GRU-ECRH partnership and explore the available positions, please visit www.gru.edu/jobs/ecrh or contact Dawn Gantt at (706) 721-4793 - dagantt@gru.edu.

Working together to:

- Improve health care outcomes
- Expand knowledge through research
- Build mental health workforce by improving the educational experience.

Better Mental Health Care for Augusta and Georgia.

Enhancing lives of people with mental illness and intellectual developmental disabilities.
