Brief Introduction – Carol J. Bickford

- BSN – University of Wisconsin-Eau Claire
- MS – Rush University
- PhD – University of Maryland, Baltimore
- Specialty – nursing informatics
- Retired Navy Nurse Corps officer
- Senior Policy Fellow, American Nurses Association
- Lead Staff, Nursing Scope and Standards, 3rd Edition
GRU College of Nursing Participants

Lucy Marion, PhD, RN, FAAN, FAANP
Community Nurse Specialist, FNP
Past experience:
ANA Scope of Practice for PHC Nurse Practitioners (1985) (Marion & Williamson)
ANA Standards of Practice for PHC Nurse Practitioners (1987) (Williamson and Marion)

Shena Gazaway, MSN, RN, Jonas Scholar
Instructor, CONAT
Public Health Nursing background
Current PhD student research interest: Socialization of Nurses
Learning Objectives

The learner will be able to:

- Describe the process of revising the ANA Nursing Scope and Standards of Practice (NSSP)
- Identify three key messages integrated within the new definition of nursing
- Name the final decision-maker represented in the professional regulation pyramid
- Describe the framework for the Standards of Practice
- Address the importance of the Standards of Professional Performance

- Shena Gazaway, MSN, RN, Jonas Scholar
Process of NSSP Revision: Experience of Jonas Scholar

- Member interactions
- Teleconferences (evenings, mostly)
  - Small Groups for selected materials: Culture-related standard
  - Write-rewrite
  - Face to Face meeting (large and small groups)
- Dissemination
  - AAN Poster
  - GRU CNR Seminar
  - GNA Presentation
  - Articles: Brief, substantial
Simultaneous Revision, 2015

Code of Ethics for Nurses with Interpretive Statements
Nursing is the:

- Protection, promotion, and optimization of health and abilities,
- Prevention of illness and injury,
- Facilitation of healing,
- Alleviation of suffering through the diagnosis and treatment of human response, and
- Advocacy in the care of individuals, families, groups, communities, and populations.
Model of Professional Nursing Practice Regulation

Peak: Self-Determination
This peak represents self-regulation and self-determination by each individual nurse in exercising judgments based on the integration of content, decisions, and actions from the three lower tiers. The resultant demonstrated behaviors reflect responsible and accountable nursing practice decisions culminating in safe, quality, evidence-based practice. The peak culminates in a point directed upward synonymous to an illuminating path from Nightingale's lamp to emphasize continued potential toward a higher level of individual professional practice regulation.

Participants: Registered nurses, graduate-level prepared registered nurses, and advanced practice registered nurses*.

Institutional Policies and Procedures
Regulation at the institutional, organizational, or systems level occurs through the established policies, procedures, and governing statements that influence and direct nursing practice and its environment.

Participants: Institutions, organizations, entities, and systems where nurses are present, chief nursing officers and executives, healthcare administrators, nursing managers, nursing supervisors, registered nurses, graduate-level prepared registered nurses, advanced practice registered nurses*, third-party reimbursement entities, and academic institutions.

Nurse Practice Act and Rules and Regulations
Legislative and regulatory authorities govern through nurse practice acts, statute, code, and regulation administered by state boards of nursing and exemplified by licensure status.

Participants: State or territorial boards of nursing, legislators, lobbyists, National Council of State Boards of Nursing, healthcare advocacy groups, healthcare consumers as voters, political action committees, registered nurses, graduate-level prepared registered nurses, and advanced practice registered nurses.

Foundation: Nursing’s Professional Scope of Practice, Standards of Practice, Code of Ethics, and Specialty Certification
ANA’s Nursing: Scope and Standards of Practice and Code of Ethics for Nurses with Interpretive Statements are essential professional resources that collectively guide nursing practice in all roles and settings. Compliance with the Code of Ethics for Nurses with Interpretive Statements and identified standards of practice and accompanying competencies reflects the expected level of competence of all nurses. Specialty certification provides additional verification and validation of competence for a focused body of knowledge and associated skill sets of practice.

Participants: American Nurses Association, credentialing and educational organizations, professional nursing organizations, healthcare consumers as care partners, registered nurses, graduate-level prepared registered nurses, and advanced practice registered nurses*.

(*The APRN direct care roles include certified nurse anesthetists, certified nurse midwives, clinical nurse specialists, and certified nurse practitioners.)
Nursing: Scope and Standards of Practice, Third Edition

- Scope of practice statement describes
  - Who
  - What – definition of nursing
  - When
  - Where
  - How
  - Why

- Standards of professional practice
Standards of Professional Practice

- Standards are authoritative statements of the duties that all registered nurses, regardless of role, population, or specialty, are expected to perform.

- Include Standards of Practice and Standards of Professional Performance.

- Each standard is accompanied by competencies for all registered nurses, with additional competencies for graduate-level prepared registered nurses and APRNs.
The Nursing Process and the Standards of Professional Nursing Practice

The Standards of Practice
These standards describe a competent level of nursing practice demonstrated by the critical thinking model known as the nursing process; its six components correspond to these standards.

<table>
<thead>
<tr>

Standards of Practice

Address the use of the nursing process

- Standard 1 Assessment
- Standard 2 Diagnosis – Should we add Problems, Issues Identification?
- Standard 3 Outcomes Identification
- Standard 4 Planning
- Standard 5 Implementation
  - Standard 5A Coordination of Care
  - Standard 5B Health Teaching and Health Promotion
  - Standard 5C Consultation
  - Standard 5D Prescriptive Authority and Treatment
- Standard 6 Evaluation
Standard 5 Implementation

The registered nurse implements the identified plan.

Competencies

The registered nurse:

- Partners with the healthcare consumer to implement the plan.
- Integrates interprofessional team partners in implementation of the plan.
- Demonstrates caring attitudes and behaviors to develop therapeutic relationships.
- Provides culturally congruent, holistic care.
- Uses evidence-based interventions and strategies to achieve.
- Integrates critical thinking and technology solutions to implement.
- Delegates according to the health, safety, and welfare of.
Additional Competencies for the Graduate-level Prepared Registered Nurse

In addition to the competencies of the registered nurse, the graduate-level registered nurse:

- Uses systems, organizations, and community resources to lead effective change.
- Applies quality principles while articulating methods, tools, and evidence-based research into the practice setting.
- Leads interprofessional teams to communicate, collaborate, and design solutions.
- Demonstrates leadership skills that emphasize ethical practices.
- Serves as a consultant to provide additional insight and potential solutions.
- Uses theory-driven approaches to effect organizational or system change.
Standard 5 Implementation - Continued

Additional Competencies for the Advanced Practice Registered Nurse

In addition to the competencies of the registered nurse and the graduate-level prepared registered nurse, the advanced practice registered nurse:

- Uses prescriptive authority, procedures, referrals, treatments, and therapies in accordance with state and federal laws and regulations.
- Prescribes traditional and integrative evidence-based treatments, therapies, and procedures that are compatible with the healthcare consumer’s cultural preferences and norms.
- Prescribes evidence-based pharmacological agents and treatments according to clinical indicators and results of diagnostic and laboratory tests.
- Provides clinical consultation for healthcare consumers and professionals related to complex clinical cases to improve care and patient outcomes.
What Professional Performance Standards Should Go, Stay, Be Added? Final list.....

- Standard 7 Ethics
- Standard 8 Cultural Congruence
- Standard 9 Education
- Standard 10 Evidence-Based Practice & Research
- Standard 11 Quality of Practice
- Standard 12 Communication
- Standard 13 Leadership
- Standard 14 Collaboration
- Standard 15 Professional Practice Evaluation
- Standard 16 Resource Utilization
- Standard 17 Environmental Health
New Standard 8: Cultural Congruence

The registered nurse practices in a manner that is congruent with cultural diversity and inclusion principles.

Competencies

The registered nurse:

- Demonstrates respect, equity, and empathy in actions and interactions with culturally diverse and vulnerable healthcare consumers.
- Participates in life-long activities to understand cultural preferences.
- Creates an inventory of one’s own values, beliefs, and cultural heritage.
- Applies knowledge of variations in health beliefs, practices.
- Identifies the stage of the consumer’s acculturation.
- Considers the effects of discrimination and oppression.
- Uses skills and tools that are appropriately vetted for the culture.
- Additional competency statements.

Special thanks ...

Elizabeth (Libby) Thomas, Chairperson – for her insight, laughter and support as we pulled this work together – she always kept us on track and on time.

Carol Bickford, ANA Staff – Content editor – for her tireless commitment to detail and to the written word. Carol was an inspiration to all of us.

Mary Jo Assi, Eric Wurzbacher and Yvonne Humes for keeping us moving forward and providing input, resources and expertise just when we needed it.

Entire team of 40 diverse nurses for giving up most Tuesday evenings for almost a year.
Call to Action – RAISE the bar

- **R**eading *Nursing: Scope and Standards of Practice, 3rd Ed*
- **A**ssessing the document and contemplating what it means to you and your practice
- **I**ntegrating *Scope and Standards of Practice, 3rd Ed* into practice by developing culturally congruent care in every situation and setting
- **S**haring the word and encouraging other nurses to integrate *Scope and Standards of Practice, 3rd Ed* into practice
- **E**xcelling in using knowledge and conducting and applying research to achieve the highest quality, evidence-based care
So...What Actions Will You Complete?

What Questions Remain?

Lucy Marion, PhD, RN, FAAN, FAANP
