Basic Photosynthesis Laboratory Set Up with Halogen Light Source and Light Sensor

A  Lab stand with mounting brackets
B  Light fitting with 50 Watt halogen source
C  Upper surface of leaf chamber
D  Water heat filter
E  Lower surface of leaf chamber
F  Light sensor in mounting cylinder
G  Power regulator control
H  Flow meter
I  Amplifier for light sensor
J  Drying column
K  Gas pump
L  Infra red CO₂ analyzer
M  Serial Box Interface
N  Mac or PC computer (not supplied)
