Restorative Materials and Techniques Simplified in 2020

April 24, 2020

41 Years
of Excellence
in CE

Guest Lecturer
Jeff J. Brucia, DDS

Presented by the Marvin C. Goldstein Family with
The **Dental College of Georgia Continuing Education** at Augusta
University at the Augusta Marriott at the Convention Center,
Augusta, Georgia.

AUGUSTA UNIVERSITY

**DENTAL COLLEGE
OF GEORGIA**

ABOUT

Dr. Marvin C. Goldstein was a noted Atlanta orthodontist and philanthropist who for 20 years sponsored an internationally renowned dental clinician to lecture at the Medical College of Georgia School of Dentistry. Dr. Goldstein believed the integrity of the dental profession could best be preserved by promoting clinical excellence and sharing information with colleagues. Following his death in 1997, Mrs. Rita (Goldstein) Wolfson arranged to perpetuate her husband's contributions to the dental profession through a gift to Augusta University that will continue the Annual Goldstein Lectureship. Augusta University and the dental profession continue to be served through the generosity of the Goldstein Family.

GUEST LECTURER

Jeff J. Brucia, DDS, is a graduate of the University of the Pacific School of Dentistry where he is currently an Assistant Professor of Dental Practice. He is practicing Esthetic and Restorative dentistry full time in San Francisco, California. Dr. Brucia is the Director of clinical education for the FACE occlusion study club. He is the 2011 recipient of the Gordon J. Christensen Recognition Lecturer Award. In 2010, Dr. Brucia was elected a fellow in the American Academy of Esthetic Dentistry and presently serves as Academy Secretary. He has also been selected by Dentistry Today as one of the top clinicians in dental continuing education today.

COURSE DIRECTOR

Michael Pruett, DMD, Assistant Professor and Director of Dental Continuing Education at the Dental College of Georgia

Dr. Jeff Brucia, Dr. Michael Pruett, Jennifer Ellison and Lynn Thigpen report no actual or potential conflict of interest in relation to this program/presentation.

42nd Annual Marvin C. Goldstein Lecture Series

Restorative Materials and Techniques Simplified in 2020

April 24, 2020

DESCRIPTION

The numerous choices in restorative materials has confused the clinician as to what is best indicated in a given situation. The continuous evolution in adhesive materials and techniques combined with the ever-increasing demands for predictable and long lasting aesthetic restorations demands continuous learning in the areas of material science and restorative techniques.

This lecture course provides an overview of the restorative options you should be considering today, as well as a comprehensive discussion of the ever-changing world of dentinal adhesives. Dr. Brucia has lectured internationally on this subject and will guide you through the collection of materials and techniques available today for providing both direct and indirect restorations that will meet your patient's expectations for quality dental care. This is a must see program for all wet-fingered restorative dentists.

OBJECTIVES

At the completion of the course, participants should be able to:

- Describe the options available in adhesive systems including the new advancements in Glass Ionomers and light curing units.
- Eliminate the risk for post-operative sensitivity and restorative failure.
- Appropriately select materials and techniques for direct composite restorations.
- Recognize which techniques and materials are best suited for near, or direct pulp exposures.
- Select the techniques for preparation, impressions, temporization, lab communication, material selection and cementation of indirect restorations including margin elevation, fiber re-enforcement, and when to seal the preparation (Immediate Dentin Sealing).
- Select the most appropriate techniques and materials for repairing porcelain fractures.

TARGET AUDIENCE

This program is designed for dentists and auxiliaries

COURSE SCHEDULE

7:30 am	Registration and Continental Breakfast
8:00 am	Welcome and Introduction of Course and Guest Dr. Barry Hammond and Dean Carol Lefebvre
