**research 1**

stress response in women  
Women's cardiovascular disease  
heart failure  
palliative medicine  
cell signaling  
melanoma  
transplantation  
keratinocyte differentiation in skin w  
oncogene  
DNA repair  
cancer proteomics  
genetics  
osteoclast differentiation/function  
neuroscience  
catheter-related infections  
diabetes  
neuroscience  
Inflammatory cell trading with MRI

stem cells  
neurology  
egg banking

estrogen effects on asthma  
diabetes  
diabetes  
hypertension  
radiology  
radiology  
Inflammatory cell trading with MRI  
prostate cancer

**research 2**

metabolic disorders in pregnancy  
Peripartum cardiomyopathy  
Peripartum cardiomyopathy  
innovatins in delivery of healthcare to the underse  
keratinocyte differentiation  
aldosterone secretion  
lung cancer  
genomic instability  
colorectal carcinoma  
alzheimers disease  
developmental neurobiology  
developmental neurobiology  
bone disease in transplant medicine  
hypertension  
Cellular viability with MRI

breast cancer  
neuroimmunology

oxidative stress  
cardiovascular complications  
vascular inflammation

Cellular viability with MRI  
metabolic effects of androgen deprivation therapy

**research 3**

operative therapies in OB/Gyn    pain control in pre-obesity

genomics

teen pregnancy

domestic violence

multiple sclerosis

infections in transplant medicine    infections in hypertension

multiple sclerosis

retinopathy

erectile dysfunction

CPR in the public and response time
