Paid Summer Internship *Applied Molecular Epidemiology*

Sponsored by

CDC Pathogen
Genomics Centers
of Excellence

- ✓ Career networking
- ✓ Mentorship
- ✓ Hands-on lab training
- ✓ Bioinformatics tutorials
- ✓ Paid experience

Calling all undergraduates in health and science:

The six-week AME Internship offers:

- ***Behind the scenes*** access to the clinical pathology laboratory workflow during an infectious disease outbreak
- ***Career exploration*** in the fields of molecular epidemiology, laboratory science, and bioinformatics as they relate to contemporary threats to public health
- ***Hands-on training*** with bioinformatics and data visualization toolkits

Days will be split between lecture/discussion sessions and wet laboratory training sessions.

The program will culminate in 15-minute student presentations. ***Apply today!***

Applicants: Please email
JAWOODALL@augusta.edu
Subject: Internship
for application instructions

Up to ten students will be notified
of their selection in May

Medical College of Georgia – Pathology
Murphey Building (BF 207)
