Graduate Medical Education Office

1.0 Purpose

To establish guidelines for program decisions concerning House Staff involvement in voluntary, compensated, medically-related work performed beyond a House Staff's clinical and educational work hours and in addition to the work required for successful completion of the Graduate Medical Education (GME) training program (i.e., moonlighting). This moonlighting may be external (i.e., outside the primary clinical site where the House Staff is training and any of its related participating sites) or internal (performed within the primary clinical site where the House Staff is training or at any of its related participating sites).

2.0 Procedure

- 2.1 House Staff at MCG may engage in moonlighting only with prior written permission from the Program Director, GME Manager, and the Senior Associate Dean of GME with a copy on file in the GME Office and the House Staff's Training file. The MCG GME Moonlighting Request Memo must be completed for this documentation. MCG GME via the Senior Associate Dean of GME or individual GME programs may prohibit moonlighting by their respective House Staff.

Note #1: PGY-1 residents are not permitted to moonlight.

Note #2: House Staff not directly employed by MCG/University System or Georgia must not engage in moonlighting unless approved by their employer with approval received by the GME Office prior to moonlighting.

Note #3: House Staff on J-1 Visa are only eligible to perform internal, supervised moonlighting. Prior written approval from both the program director and Inteleath's Responsible Officer (i.e., MCG GME Manager) is required before these activities can begin. Programs, not individual J-1 physicians, must initiate these requests. Programs must contact the GME Office for processing and approval before any activity takes place.

- 2.2 Moonlighting is voluntary. House Staff must not be required to engage in moonlighting under any circumstances. GME training encompasses a large amount of time and effort, and House Staff must evaluate their own wellness and work-life balance before engaging in moonlighting. Moonlighting must not interfere with the ability of the House Staff to achieve the goals and objectives of the educational program (i.e., the GME training program), and must not interfere with the House Staff's fitness for work nor compromise patient safety. These requirements must be ensured by the Program Director and the House Staff. GME training and patient safety take precedence over moonlighting. Therefore, programs must monitor the effect of moonlighting activities on House Staff performance in the program, and adverse effects may lead to the withdrawal of permission to moonlight.
- 2.3 Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a rotation, inclusive of all required clinical and educational activities to include clinical work done from home and all moonlighting whether internal or external.
- 2.4 All House Staff engaged in moonlighting must be licensed for unsupervised medical practice in the State where the moonlighting occurs if the moonlighting is external or the moonlighting is internal to Wellstar MCG Health (WMCG) but unsupervised. Only fellows who meet WMCG credentialing criteria may engage in unsupervised moonlighting at WMCG; residents may not engage in unsupervised moonlighting at WMCG. It is the responsibility of the moonlighting House Staff and the institution hiring the House Staff for moonlighting to determine whether such licensure is in place, whether adequate liability coverage is provided, and whether the House Staff has appropriate training
