UME GME Faculty Development

Purpose

- Determine the feasibility of a remote and joint training program for continued ultrasound education (UME through GME)
- Serve as a demonstration project to refine the technology and process needed to maximize educational efficiency of the program
- To provide data for the 3+3 model for using continuation of ultrasound training as a recruitment incentive to a rural residency training location

Educational Objectives

- To provide the educational expertise and technological resources in point of care ultrasound to allow for remote training of learners across the state of Georgia
- To train physicians-in-training how to diagnose and refine a differential diagnosis at bedside to decrease cost of care and improve patient focused-outcomes.
