

CURS Funding – Fall 2015

Faculty Name	Title of Project:	Department:
Allison Foley	Assessing Citizen Satisfaction with Police in Richmond County, Georgia	Sociology, Criminal Justice, and Social Work
Amy L. Abdulovic-Cui	Investigating the in vivo role of Hob1 in genomic stability	Biological Sciences
Angie Spencer	Equipment to support undergraduate research in biochemistry	Chemistry and Physics
Bruce M. Saul	St. Catherines Island Fish Assemblage	Biological Sciences
Caterina Hernandez	The effect of chlorpyrifos on key axonal transport and neuronal plasticity proteins	Pharmacology and Toxicology
Ellen K. LeMosy	Prospective Dominant Negative Mutations of Wnt Signaling in Zebrafish Development	Cellular Biology and Anatomy
Jennifer D. Cannon	Determination of PFOA's Effects and Mechanism of Action in MCF-7 Breast Cancer Cells	Biological Sciences
Maria Eugenia Sabbatini	The role of adenylyl cyclase/adenylyl cyclase-associated protein 1 (CAP1) complex in regulating actin filament dynamics in pancreatic cancer cells	Biological Sciences
Melanie Kitchens O'Meara	Goblin Market	Communications
Rick Kenney	Communicating Culture Through a Zumba Class	Communications
Robert Cromer	Comparison of Salivary Cortisol in Dogs Kept in Shelters and Dogs Kept in Homes	Biological Sciences
Roger Arce-Munoz	Murine Dendritic cell interactions with oral pathogens	Periodontics
Tim Sadenwasser	National Collegiate Honors Council conference	Honors Program
