

# AUGUSTA UNIVERSITY

## The Institute of Public and Preventive Health

### Career Opportunities

A career in a variety of settings including health care facilities, governmental agencies, private industries and community-based organizations:

- Health management director
- Community health program manager
- Clinical information systems analyst

Situated within an academic health center, we offer unique clinical research collaborations within Augusta University Medical Center.

The university's proximity to private industries such as John Deere, E-Z-Go Textron, Club Car, Kimberly-Clark, International Paper, and Kellogg's enables internship and training experiences with established professionals.

Our graduates have leadership roles in health care organizations, public health agencies, research institutes, and the pharmaceutical and information technology industries.

*"An MPH degree can give you the tools you need to make a difference in the health and well-being, not only in our community, but globally."*

- Monirul Islam MBBS, MPH, PHD

Fall Admission: May 1  
Spring Admission: November 1

# MASTER OF PUBLIC HEALTH

AUGUSTA UNIVERSITY  
Institute of Public  
and Preventive Health

## MASTER OF PUBLIC HEALTH

### The Value of an MPH

The Master of Public Health (MPH) degree is a multidisciplinary professional degree emphasizing the practical aspects of public health. The program is designed to give both clinicians and nonclinical professionals – with undergraduate preparation in any field – knowledge and skills in core public health competencies to promote the health of populations in today's rapidly changing environment.

Professionals with an MPH degree are leaders in evidence-based public health practice including patient-centered care and community health. Our MPH program prepares professionals with the research skills to critically evaluate public health literature and put those results into practice.

Augusta University offers an innovative, collaborative MPH program with concentrations in health management, health informatics, environmental health, and social and behavioral sciences. The MPH program is accredited by the Council on Education in Public Health (CEPH).

### Health Management

Prepares professionals with an interdisciplinary knowledge base and skill set for administrative and leadership positions in the increasingly complex health care and public health sectors.

### Health Informatics

Prepares professionals with requisite knowledge and skills to create, analyze and manage information systems and technologies to improve health delivery and outcomes.

### Why Augusta University?

Our MPH program supports the working professional pursuing a graduate degree. It attracts students from diverse backgrounds, including medicine, finance, nursing, engineering, information systems and allied health.

At Augusta, you'll find a comprehensive educational experience designed to prepare leaders with critical-thinking, problem-solving and information-management skills that improve health care delivery and promote public health.

### Program Benefits

- Two concentrations
- Capstone research experience
- Coursework primarily online
- Can be completed in two years
- Can be taken part-time
