Electives Open to 4th Year Students Only ......................................................................... 56
Registering for Rotations

A. General Information:

1. In order to be officially enrolled into any selective or elective, students must submit the completed appropriate course form to the Curriculum Office.

2. Students must be enrolled in a course prior to starting in order to receive credit. We cannot provide retroactive credit for courses if you are not properly enrolled.

3. Malpractice: You must be officially enrolled in a course to be covered by malpractice insurance.
   a. In Georgia, No student who engages in the practice of medicine under the supervision of a medical facility, academic institution, or doctor of medicine, as a part of an academic curriculum leading to the award of a medical degree, shall be liable for any civil damages as a result of any act or omission in such practice of medicine, except for willful or wanton misconduct." (Georgia Code 1981, section number 51138, Effective date: July 1, 1987)
   b. In the United States but NOT in Georgia students officially enrolled at MCG are covered by Professional Liability Insurance while at U.S. institutions out of the state of Georgia.

B. Course Forms

1. The appropriate course form should be completed in order to enroll in selectives and electives. Copies of these forms can be found on the Curriculum Office home page.

2. There are 4 types of course forms:
   a. Add Form: use for all MCG sponsored courses on all campuses
   b. Off Campus Elective Form: use for all off campus electives inside the United States
   c. Drop Form: use for all electives, selectives, and clerkships regardless of campus.

3. After completion of the student portion of the form, students should submit the form to the appropriate location (explained on the form) for approval. Please note that completed forms must be submitted by email in order to maintain an accurate record of the submission. Students are not officially enrolled until the completed form is processed by the Curriculum Office.

Dropping and Adding Electives

Dropping Courses

1. All electives on the Augusta campus, except continuous electives, may be dropped any time prior to three weeks from the start date of the elective.

2. Clerkships and selectives on all campuses as well as electives outside Augusta (except continuous electives) may be dropped prior to six weeks from the start of the course.

3. Without special permission from the department and the Curriculum Office, courses may not be dropped after the deadline. After the deadline, students are required to withdraw from a course and will not be allowed to sign up for any course during that month. In addition, the withdrawal will be recorded on the student's transcript as a “W”.

Adding Courses

4. Courses may be added to the schedule at any time up to the beginning of the course as long as the student has an open month and has obtained approval from the appropriate department or institution.

5. Gaining approval from the department and/or institution may involve verifying that there is sufficient room in the course, receiving permission from the sponsoring faculty, and completing all necessary paperwork for the course in a timely fashion (including anything required by the hosting facility).

Please post the Drop/Add schedule in a prominent location and take it seriously!

Except for extraordinary circumstances, the above policy will be strictly enforced.
Course Listings

A. The following pages list all of the selective and elective courses available through the Medical College of Georgia. Each listing contains the course title, course number, course category, course classification (see description above), contact person, months offered, and a brief description of the course.

B. Each course description also has an eligibility listing, which refers to the course prerequisites. Courses listed as “All” have no prerequisites and can be taken by all students. Courses listed as “Enrichment Only” can be taken only by students who have completed all Core Clerkships. Courses listed as “Clerkship +” may be taken by any student who has completed all of the clinical portion of the clerkship within that department or part of the clinical portion and passed the shelf exam for that clerkship. Note that clerkship students can find a list of courses which are open to them on the final pages of this bulletin. A few courses have additional requirements which are listed in this category as well.

C. With few exceptions, course locations are not included in the course listing. Most of the listed courses are available on the Augusta campus. Many of the courses are also offered on the various regional campuses as well. For information about courses on the Augusta campus, please check with the sponsoring department. For information about courses on the regional campuses, please check with the corresponding regional campus office.

D. All courses listed are subject to the availability of faculty and resources. Because of lack of available faculty or other resources, some courses may not be offered at a given time even though they are listed in the bulletin. Check with the sponsoring department for more information about which courses are available currently.

Course Classification/Credit Hours

A. Classifications: MCG courses are classified to denote either the graduation requirement they fulfill or the number of credit hours that students earn.

1. Category: Clinical vs. Non-Clinical Electives:
   - Clinical electives can be 2 or 4 weeks. Only 4-week clinical electives will count towards the Advanced Clinical Selective requirement (Class of 2024 and beyond).
   - Non-Clinical Electives may be 2 or 4 weeks, but do not count towards the Advanced Clinical Selective Requirement.

2. Classification: 2 week or 4 week
   - Courses are listed as either 2 week or 4-week courses based on the length of the course.
   - Courses listed as 2 week/4 week offer both a two week and a 4 week option
   - A small number of 4-week courses will only count for 2 weeks of credit toward graduation based on workload. These courses are listed below and are also noted in the course description in the main section of the bulletin.

Selectives
**Critical Care Selective**

**Anesthesia Critical Care**

*ANES 5015*

Category: Critical Care  
Classification: Selective  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: Enrichment Only  
Maximum Enrollment: 4  
Months Offered: August - April

Course Description: This course is designed to educate and expose students to the general medical principles and management of critically ill surgical patients in the Intensive Care Unit environment. Students will participate in daily rounds with the critical care team following one to two patients per day. In addition, students will participate in procedural interventions.

Assessment: ☒ Faculty/Resident Evaluation  
☒ Test/Quiz (BLS/ACLS)  
☐ Presentation

**Medical Critical Care**

*GMED 5034*

Category: Critical Care  
Classification: Selective  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: Enrichment Only  
Months Offered: all

Course Description: This elective is designed to provide an intensive experience in critical care medicine. Emphasis is placed upon clinical evaluation and management of critically ill patients: mechanical ventilatory support, hemodynamic and ventilatory monitoring and other critical care interventions. Didactic sessions, conferences and teaching rounds provide a broad view of clinical approaches to critically ill patients.

☐ Other

**Neurology Critical Care**

*NEUR 5010*

Category: Critical Care  
Classification: Selective  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: Enrichment Only  
Months Offered: all

Course Description: This is a patient care elective. The student will have primary care responsibilities for a group of patients in the Neurological Critical Care Unit. The student will participate in rounds and conferences and will assist with the diagnostic procedures involving his/her patients. The course is designed to give students a firm grounding in the care of neurological patients in the critical care setting.

☐ Other

**Neonatal Critical Care**

*PEDS 5001*

Category: Critical Care  
Classification: Selective  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: Enrichment Only  
Months Offered: all

Course Description: Each day will involve patient care in the NICU. Students are expected to follow a minimum of 2-3 patients or 2/3 the load of interns on the team and work 2 weekend days. Students will also attend daily formal lectures and teaching rounds. The rotation is designed to help senior students develop the skills to gain clinical and technical competency in Neonatal-Perinatal Medicine.

☐ Test/Quiz  
☐ Presentation  
☐ Other
Pediatric Critical Care
PEDS 5018
Category: Critical Care
Classification: Selective
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: Enrichment Only
Months Offered: all

Course Description: This rotation is designed to teach students to assist in the care of critically ill children and develop a multiple organ systems approach for evaluation and treatment. Activities include evaluation of newly admitted patients to the pediatric intensive care unit, development of multiple organ systems-based evaluation and management plans on all patients, provision of daily organ systems-based written documentation on the progress of all their patients, and making oral presentations on rounds to the attending and other team members. Students will be required to work 2 weekend days.

Surgery Critical Care/Trauma
SURG 5005
Category: Critical Care
Classification: Selective
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: Enrichment, priority for students declaring Surgery as a sponsoring department
Months Offered: all

Course Description: In this course, students will be involved in the care of patients on the Trauma Service. These patients frequently have injuries and functional disruption of multiple organ systems and therefore offer opportunity for learning complex trauma and critical care management. Neurological, cardiovascular, pulmonary and renal physiology are stressed and the frequent ultrasound, intracranial pressure monitoring and mechanical ventilator support provide extensive experience in the care of the critically ill. Students will be an active member of the Trauma Team.

**Sub-I Selective**

**Family Medicine Sub-I**

*FMPC 5003*

Category: Sub-I  
Classification: Selective  
Contact: Clerkship Coordinator, Regional  
Campus Coordinator  
Eligible: Enrichment Only  
Months Offered: all

**Course Description:** Students will function as a sub-I in order to develop the skills necessary to function as a successful house officer in the inpatient and ambulatory setting of family medicine.

**Medicine Sub-I**

*GMED 5011*

Category: Sub-I  
Classification: Selective  
Contact: Clerkship Coordinator, Regional  
Campus Coordinator  
Eligible: Enrichment Only  
Months Offered: all

**Course Description:** Students taking the acting internship will essentially function as an intern on the team, admitting patients in sequence with the interns and working directly under the resident. Acting interns will be expected to attend all conferences the interns attend. The acting intern will complete the initial work up and determine the treatment plan in conjunction with the resident. The acting intern will function as the primary care physician for his/her patients but will be closely supervised in all activities by the resident and attending faculty physician. The acting interns on call schedule will be identical to that of the ward team.

*NEUR 5001*

Category: Sub-I  
Classification: Selective  
Contact: Clerkship Coordinator, Regional  
Campus Coordinator  
Eligible: Enrichment Only  
Months Offered: all

**Course Description:** This is a patient care course. The student will have primary care responsibilities for a block of neurological inpatients. The student will participate in rounds and conferences and will assist with the diagnostic procedures involving his/her patients. The course is designed to give students a firm grounding in neurological concepts and in the recognition and initial management of common neurological problems in the inpatient setting.

**OBGN 5009**  
Category: Sub-I  
Classification: Selective  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: Enrichment Only  
Months Offered: all (August – October may be restricted to OB declaring students)

**Course Description:** The student will participate in the expanded management of inpatient and outpatient gynecologic patients. Outpatient experience will include exposure to patients with common problems, as well as routine preventative care. The inpatient experience will consist of participation in the operating room, inpatient consults, and following assigned patients. Students will be responsible for their assigned patients. During the Sub-I course, students will be a part of one of four teams: Gynecologic Oncology, Benign Gynecology, Maternal Fetal Medicine or Urogynecology.

**Pediatrics Sub-I**  
**Peds 5009**  
Category: Sub-I  
Classification: Selective  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: Enrichment Only  
Months Offered: all

**Course Description:** Students will function in the role of a first year pediatric resident. The upper-level pediatric resident on the team is responsible for directly supervising and writing daily notes on the senior student’s patients. Activities will include evaluating newly admitted pediatric inpatients under the supervision of a pediatric resident and/or attending, developing evaluation and management plans on all patients, providing daily written documentation on the progress of all their patients, making oral presentations on rounds to the attending and other team members, and handing off patients between Day Team and Night Team. Students will be required to complete a web-based portfolio. Students are expected to follow a minimum of 2-3 patients or 2/3 the load of interns on the team and work 4 nights on the Night Team and 3 weekend days.

**Surgery Sub-I**  
**Surge 5007**  
Category: Sub-I  
Classification: Selective  
Contact: Clerkship Coordinator  
Eligible: Enrichment Only  
Months Offered: all

**Course Description:** In this course, students will function as substitute interns on a surgical service. Students are lottery assigned to a specific surgical service and will function as an integral part of that service. Students are expected to initiate the clinical database, begin diagnostic measures and where possible, perform surgical procedures with supervision. Additionally, students will participate in teaching responsibilities, conferences, clinics, operating and night call experiences of the service. Surgical services include Acute Care Surgery, MIS, Pediatric Surgery, Plastic Surgery, Surgical Oncology, Transplant and Vascular Surgery. Specialty Services include Neurosurgery, Otolaryngology, Orthopedic Surgery and Urology.

Surgery Sub-I for Military Students
SURG 5016
This course is for MCG Military students only.
Category: Sub-I
Classification: Selective
Contact: Clerkship Coordinator
Eligible: Enrichment Only, with approval of Surgery Clerkship Director
Months Offered: all

Course Description: In this course, students will function as substitute interns on a general surgical service at an approved institution (must be an academic institution with house staff). Students rotate on an assigned surgical service, and will function as an integral part of that service. Students are expected to initiate the clinical database, begin diagnostic measures and where possible, perform surgical procedures with supervision. Additionally, students will participate in teaching responsibilities, conferences, clinics, operating and night call experiences of the service. Surgical services include Acute Care Surgery, MIS, Pediatric Surgery, Plastic Surgery, Surgical Oncology, Transplant and Vascular Surgery. Specialty Services include Neurosurgery, Otolaryngology, Orthopedic Surgery and Urology.

Anesthesiology and Perioperative Medicine

Anesthesiology Research
ANES 5002
Category: Non-Clinical
Classification: 4 Weeks
Contact: Carol Dickerson, Research Manager
Eligible: All
Months Offered: July - June, by arrangement

Course Description: The anesthesiology research elective is designed to introduce medical students to the scientific method, experimental design, methodology, and data analysis. The primary focus of our basic science labs is the pathophysiology of sickle cell disease. Our clinical research is more varied, and tends to revolve around modes of anesthesia and analgesia in particular patient populations, imaging techniques, and graduate medical education training techniques.

☐ Test/Quiz ☒ Presentation
☐ Other:

Anesthesiology Off-Campus Externship
ANES 5003
This course requires application using VSAS or other arrangements made by the student.
Off-Campus Add Form Required
Category: Clinical
Classification: Off-Campus
Contact: Clerkship Coordinator
Eligible: Enrichment Only
Months Offered: all

Course Description: Clinical experience in Anesthesiology at an off campus hospital introducing student to the basic principles of anesthesiology; critical care medicine or pain management and development of basic knowledge for the perioperative management of the patient.

Assessment: ☒ Faculty/Resident Evaluation
☐ Test/Quiz ☒ Presentation
☐ Other:

Pain Management
ANES 5008
Category: Clinical
Classification: 4 Weeks
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: All
Months Offered: August - June

Course Description: Students need to declare at the time of selection whether they wish to participate in basic or clinical research. Prerequisites for participation in clinical research are 1) completion of CITI training (Group 2 and Good Clinical Practices) and 2) linking of CITI training and CV to IRB Net at least 3 months before start of elective. This allows students to be added to an appropriate IRB prior to the start of the elective.

Anesthesiology Externship
ANES 5011
Category: Clinical
Classification: 4 Weeks
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: All after completing Asepsis Training
Months Offered: July – May

Course Description: This course is designed to introduce medical students to the basic principles and practice of Anesthesiology and Perioperative Medicine. During the rotation students will rotate with faculty and residents on a daily basis. The locations will include the general operating room and other sub specialty areas. Assessment to include Faculty/Resident evaluation and Presentation.

Assessment: ☒ Faculty/Resident Evaluation
☐ Test/Quiz ☒ Presentation

**Respiratory Care**

**ANES 5014**

Category: Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: All  
Maximum Enrollment: 25 (Minimum 5)  
Months Offered: July - April  

Course Description: This course is designed to help students develop the skills necessary to treat patients with respiratory insufficiency, manage a patient in need of mechanical ventilation or other respiratory therapy modalities as indicated. In addition, students should be able to provide adequate BLS and ACLS to patients in a “Code Blue” situation. Students attend class for 4 weeks covering the basic concepts of respiratory pathophysiology concentrating on mechanical ventilation. This is achieved through a combination of lecture and hand-on demonstration. Students are also expected to give a presentation.

Assessment: ☒ Faculty/Resident Evaluation

Biochemistry and Molecular Biology

Biochemistry and Molecular Biology Research
BCMB 5002
Category: Non-Clinical
Classification: 4 Weeks
Contact: Kim Lord, Biochemistry Faculty
Eligible: All with faculty approval
Months Offered: by arrangement

Course Description: Critical evaluation of research articles; design and execution of specific experiments; training and experience in various laboratory techniques; analysis and critical interpretation of experimental data; participation in laboratory weekly meetings and departmental seminars.

Assessment: ☐ Faculty/Resident Evaluation
☐ Test/Quiz ☐ Presentation
☒ Other: Oral Examination
Cellular Biology and Anatomy

Anatomy Research
ANAT 5002
Category: Non-Clinical
Classification: 4 Weeks
Contact: Dr. Sylvia Smith
Eligible: All with faculty approval
Months Offered: All

Course Description: The student will participate in writing a short research proposal relevant to a project in the PI’s lab. The student will gain knowledge of the literature of the field, will obtain training and experience in appropriate laboratory methods, analysis and critical interpretation of experimental data; will participate/attend journal clubs, lab meetings and departmental seminars as deemed appropriate by the PI.

Clinical Anatomy and Teaching Skills
ANAT 5005
Category: Teaching
Classification: 4 Weeks
Contact: Department Faculty
Eligible: All with faculty approval
Months Offered: August - April
Note: this course is currently offered in Athens only; students on other campuses should refer to MEDI 5012 the Medical Education elective

Course Description: The student will have an opportunity to reexamine anatomy relevant to future specialty training and to have a mentored teaching experience among first year medical students in the gross anatomy lab. Students will be assigned to groups according to their area of interest.

Dermatology

Dermatology Externship

**DERM 5001**
Category: Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: All  
Months Offered: all  

Course Description: Students will see Dermatology patients in the hospital clinic. When available students will participate in Dermatopathology teaching conferences, Morphology Conferences, Grand Rounds, Basic Science teaching conferences, and Journal Club. Supervision will be provided by the dermatology faculty as well as house staff in some locations.

Assessment: ☒ Faculty/Resident Evaluation

Advanced Dermatology

**DERM 5003**
Category: Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator  
Eligible: Enrichment Only after taking DERM 5001  
Months Offered: all  

Course Description: This elective is designed for students who plan to enter Dermatology residency training. Like students in the 5001 course, participants will see patients at the MCG Hospital and Clinics as well as in the VAMC Dermatology Clinic. Students will participate in Dermatopathology teaching conferences, Morphology Conferences, Grand Rounds, Basic Science teaching conferences, and Journal Club. Supervision will be provided by the dermatology faculty and house staff. In addition students in this course will be given more opportunity to participate in Dermatology research and scholarly projects.

**Emergency Medicine**

**Emergency Medicine Externship**

**EMED 5002**
- Category: Clinical
- Classification: 4 Weeks
- Contact: Clerkship Coordinator, Regional Campus Coordinator
- Eligible: Enrichment Only after taking EMED 5001
- Months Offered: all

**Course Description:** This rotation is designed for students interested in Emergency Medicine as a career to give them a chance to work more closely with EM faculty. Students will serve as externs in the Emergency Department seeing patients under the direct supervision of EM faculty. Students will assume the primary medical care responsibilities for patients and work independent of EM resident input. Students will also present a lecture during weekly EM grand rounds. Students will rotate on a local ambulance service for two shifts.

**Assessment:** ☒ Faculty/Resident Evaluation
☐ Test/Quiz ☒ Presentation

**Emergency Medicine Off-Campus Externship**

**EMED 5005**
- Category: Clinical
- Classification: Off Campus
- Contact: Clerkship Coordinator
- Eligible: Enrichment Only after taking EMED 5001
- Months Offered: all

**Course Description:** Teaching materials will be provided by the chosen facility. The rotation should provide ample clinical experience, patient contact, and procedures. Some sites may have dedicated procedure practice sessions. Clinical instruction in the initial evaluation and stabilization of the acutely ill and injured patient should be provided by working alongside Emergency Medicine faculty (and possibly residents) who are present 24 hours a day. Students should work a variety of shifts including days, evenings and nights, including some weekends.

**Assessment:** ☒ Faculty/Resident Evaluation
☐ Test/Quiz ☒ Presentation
☐ Other:

**Emergency Medicine Research**

**EMED 5004**
- Category: Non-Clinical
- Classification: 4 Weeks
- Contact: Dr. Jim Wilde, Clerkship Coordinator, Regional Campus Coordinator
- Eligible: All with faculty approval
- Months Offered: by arrangement

**Course Description:** Students will choose a research topic with the aid of the department research director, who will match them to an appropriate faculty member within the Department of EM. The students will perform a literature search and produce a short written research proposal for approval by the Human Assurance Committee. With the aid of the faculty advisor and a research statistician, the student will conduct the research project, analyze the data, and create a one paragraph abstract describing the research findings. In some cases the department may have well developed research projects that require additional assistance. These projects may also be undertaken to fulfill the requirements of the elective.

**Assessment:** ☒ Faculty/Resident Evaluation
☐ Test/Quiz ☒ Presentation
☐ Other: written abstract

**Emergency Ultrasound**

**EMED 5008**
- Category: Clinical
- Classification: 4 Weeks
- Contact: Clerkship Coordinator, Regional Campus Coordinator
- Eligible: Enrichment Only
- Months Offered: July-October; January- April

**Course Description:** The EMED 5008 is a 3 credit hour elective focusing on point-of-care ultrasound for MCG Phase 3 Year 4 medical students. The elective is offered in July, August, September, October, January, February, March, and April. The goals of this elective course are to promote Point-of-Care Ultrasound (POCUS) as a clinical skills tool to enhance the educational experience of students with basic science content and to transform basic knowledge and experience of students with ultrasound technology to enable readiness to incorporate POCUS skills set into clinical practice. This course will introduce medical students to a variety of POCUS scanning techniques through lectures and hands-on scanning sessions. Course assessments will include didactic learning assessments, image interpretation assessments, and ultrasound scanning assessments.

☐ Other:

Emergency Medical Services
EMED 5014
Category: Clinical
Classification: 4 Weeks
Contact: Athens Campus
Coordinator Eligible: Enrichment Only
Months Offered: all
Note: this course is currently offered only on the Athens campus

Course Description: The course is designed to give students a better understanding EMS systems. Students will get experience with EMS administration and operations, on-line and off-line medical control, and disaster medicine. Students will also gain experience with the prehospital assessment and transport of patients by participating in ride-alongs with paramedics in the field.

**Health Policy and Advocacy**

*FMPC 5020*

Category: Non-Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: All  
Months Offered: all

**Course Description:** The course will engage students in researching key health policy topics and developing advocacy strategies to influence policy in these areas. Students will be engaged in discussions about required readings, literature reviews, and data analysis. Group discussions and small group work will be utilized to complete tasks. Sometimes group members may include full time faculty / staff assigned to certain topics and other times groups may be composed of solely students with a faculty lead. Students will required to conduct extensive literature reviews and acquire latest research findings in topic area of interest, develop and participate in advocacy strategic planning, and develop and scholarly work products (e.g. fact sheets, position white papers, resolutions, etc.) and utilize these as indicated with various advocate groups.

**Population Health/Business in Medicine**

*FMPC 6000*

Category: Non-Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator  
Eligible: All  
Months Offered: All

**Course Description:** Students will rotate with the AU population health department in order to gain an understanding of the new models of health care. This will be an interdisciplinary four-week elective during the fourth year of medical school. Medical students will work with the population health team, pharmacy students, Nursing/DNP students, Physician Assistant (PA) students and other members of the healthcare team. The goal of the four-week elective would be for the students to identify and solve real problems facing hospitals and clinics today. Students will understand why the payment structure for healthcare is shifting from fee for service to pay for performance or Value Based Care. Students will understand and be able to explain key terms such as Population Health, Per Member per Month (PMPM), Share Savings, Hospital Value-Based Purchasing Program (VBP), Pay for Performance (P4P), and the Medicare Access Chip Reauthorization Act of 2015 (MACRA) or the Quality Payment Program (QPP). The students will gain a deeper understanding of the transformation of healthcare to meet the Quadruple Aim of the Institute of Healthcare Improvement (IHI), which is improving the patient experience of care, improving the health of populations, reducing the per capita cost of health care, and improving healthcare wellness.

**Food as Medicine: An Elective Addressing Diet-Related Illnesses Affected by Poverty**

*FMPC 6004*

Category: Non-Clinical  
Classification: 4 Weeks; For the Class of 2022, this will be considered a Class 1/clinical elective. For the Class of 2023 and later classes, this will be counted as a 2 week/4 credit hour elective.  
Contact: Clerkship Coordinator  
Eligible: All  
Months Offered: All

**Course Description:** Students will gain a first-hand understanding of the barriers to health – especially as they influence diet – in an impoverished urban neighborhood. Attend nutrition education lectures, help conduct and attend nutrition-based cooking classes with a professional chef during the month, attend a bariatric information session with a health psychologist, work with members of the American Culinary Federation and Augusta District Dietetic Association, and conduct a home-based study of one or two families to analyze the connections between poverty and diet-related illnesses.
**Bioethics**

The Bioethics certificate program is run through Dr. Wendy Turner on the Summerville campus. Only ONE of these Bioethics Courses will count for elective credit toward graduation, although additional courses can count towards your certificate in Bioethics.

For Bioethics Course Registration & Questions, please contact Kim Dyches - kidyches@augusta.edu

**Bioethics Scholarly Activity**

**FMPC 6001**

Category: Non-Clinical  
Classification: 4 Weeks  
Prerequisite: PHIL 5004, Foundations in Bioethics  
Contact: Curriculum or Bioethics Faculty  
Eligible: All  
Months Offered: Registered as full semester course regardless of when you sign up  

Course Description: This course will provide bioethics graduate certificate candidates with a practical experience in performing scholarly work in bioethics. Under the guidance of the course director students will develop a research proposal, develop and conduct the project, analyze the data and make conclusions. The work should be of sufficient quality to be presented as a poster in a research competition or to be submitted for publication in a peer reviewed journal.

**Epidemiology Atlanta Externship**  
*GMED 5056*

Category: Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator  
Eligible: Enrichment Only  
Months Offered: September - June  

**Course Description:** This elective is designed to introduce the student to applied epidemiology, preventive medicine, and public health as practiced at CDC. Students have the opportunity to actively assist in epidemiologic investigations of infectious diseases and in studies of a wide variety of public health problems such as chronic, environmental, and occupational diseases, injuries, and reproductive health. Students work under the supervision of CDC epidemiologists and work on specific projects. Students are also exposed to day-to-day operations and a broad range of activities at CDC. Familiarity with computers and data analysis is helpful but not essential. Students are responsible for providing their own living and travel expenses.

**Special Circumstances:** Application period is open February 3rd – March 31st for 2020-2021 rotations. [https://www.cdc.gov/epielective/](https://www.cdc.gov/epielective/)

**Medical Education**  
**MEDI 5012**  
Category: Teaching  
Classification: 4 Week Classification, but coursework/assignments may be extended past block  
Contact: Dr. Anna Edmondson  
Eligible: Enrichment Only  
Months Offered: all  

**Course Description:** The course provides students with a foundation in the principles of medical education. It allows students to tailor the experience to fit their chosen specialty and career path. It is composed of three different components: core medical education curriculum, teaching and scholarship. These components consist of both required offerings and voluntary sessions, which students will choose from in order to fulfill the requirements. Students will engage with material from relevant underlying “methods” disciplines from the learning sciences, including topics such as selection of research subjects, alignment of learning objectives with activities and assessments, active learner engagement, and so forth. The main clinical or science content will be selected by the student and the invited teaching faculty to be most relevant to the student’s chosen field.

**CBL Medical Education Elective**  
**MEDI 5014**  
Category: Teaching  
Classification: 4 Weeks  
Contact: Dr. Louise Thai  
Eligible: Enrichment Only  
Months Offered: all  

**Course Description:** The four-week long CBL (Case-Based Learning) Elective is intended for M4 students who are interested in developing small group teaching and clinical case writing skills in preparation for career in academic medicine. The goal of this elective is to introduce students to the Socratic method of teaching as it applies to CBL while allowing them to tailor the experience according to the specialty of their choice for residency.

**Simulation Education Elective**  
**MEDI 6001**  
Category: Teaching  
Classification: 4 Weeks  
Contact: Dr. A.J. Kleinheksel  
Eligible: All with faculty approval  
Months Offered: All  
Enrollment cap: 8 at a time

**Course Description:** This elective is designed to introduce students to the science, art, and technology of simulation in medical education. Students will learn the fundamental principles of medical simulation, including supporting learning theories, best practices in facilitation, case design, and performance assessment. During this course students will observe simulations from “the other side of the glass,” develop their own simulation case, and run and debrief simulations as the facilitator. There are three tracks in which students can choose to facilitate and design their simulation case: Clinical Simulations, Patient Centered Learning, or Clinical Progression Assessments. The length of the course is two or three months, depending on the time of year and track selected. This course will be particularly valuable to those students interested in academic medicine, as well as to students who intend to apply for a medical simulation fellowship.

**Assessment:**

**International and Travel Medicine**  
**EMED 5007**  
**Apply Through Study Abroad – Terra Dotta System**

**Category:** Clinical  
**Classification:** International  
**Contact:** Dr. Dan Kaminstein, Global Health Director  
**Eligible:** Enrichment Only  
**Months Offered:** by arrangement

**Course Description:** EMED 5007 is a supervised clinical experience that allows students to engage in patient care under the direct supervision of faculty trained and familiar with travel medicine, clinical tropical medicine, and medicine in resource-limited settings. Opportunities exist ranging from hospital-based experience to remote mobile village clinics. Students may join AU faculty on a planned trip or arrange their own experience to a site where they will be supervised. Pre-trip asynchronous lectures and reading materials are required to prepare students for international travel. On average six months planning and interaction with the course director/team leader, and medical school administration must occur before the beginning of the rotation month. This allows for appropriate time to begin vaccinations, plan hotel and transportation, and organize supplies. Students will be responsible for all costs, e.g. airfare and ground expenses.

As an elective for credit toward graduation from medical school, it is inherent that the experience have significant medical educational content that involves direct clinical care; eg a foreign language immersion class will not be approved unless there is patient contact to practice those skills.

Although this course has an Emergency Medicine course designation, the clinical rotation does not have to be an EM experience. Clinical work can be performed in the student’s specialty of choice. Students must be able to identify a supervising physician who will be at the location during their rotation and who will be primarily responsible for student supervision and completion of an evaluation form.

**Goals for Global Health Elective**

- Gain knowledge about the diagnosis and clinical management of acute and chronic medical problems in an international setting.
- Understand the complexity involved in the delivery of public health in parts of the world where resources are limited. Learning to think beyond disease states as drivers of public health.
- Increase history taking and physical exam skills by applying them in settings where advanced imaging and laboratory tests are less available.
- Learn how to communicate and care for patients with the additional challenges of cultural and language barriers.

Maternal Fetal Medicine Externship
OBGN 5005

Category: Clinical
Classification: 4 Weeks
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: Clerkship +
Months Offered: all

Course Description: This is a clinically oriented block of time during which the student will participate in the inpatient antepartum service, and outpatient care of high risk obstetric patients. Responsibilities are similar to those of a sub-intern working closely with the OB faculty and house-staff. The student will also present cases at the clinical conferences dealing with high risk pregnancies, and be responsible for any assigned reading material. The student will make an in-depth presentation on a topic to be determined at the beginning of the rotation.

Reproductive Endocrinology Externship
OBGN 5006

Category: Clinical
Classification: 4 Weeks
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: Clerkship +
Months Offered: all (August – October may be restricted to OB declaring students)

Course Description: The student will participate in the Reproductive Endocrinology, Infertility and Genetics Clinic. Students will be involved in day-to-day management of infertility in cycling patients including ultrasound, intrauterine insemination, in vitro fertilization, and reproductive preserving surgery. The student will see complex endocrine and genetics patients directly under faculty supervision, and will present patients at the weekly clinical conference. There will be also be exposure to the weekly research conference.

Gynecologic Oncology Externship
OBGN 5007

Category: Clinical
Classification: 4 Weeks
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: Clerkship +
Months Offered: all (August – October may be restricted to OB declaring students)

Course Description: The student will participate in all aspects of gynecologic oncology within a high volume GYN ONC practice. Involvement includes participation in work up, treatment and follow-up with comprehensive care inclusive of associated physical and mental health issues. He/she will also be exposed to a high volume of surgery from routine hysterectomies to complex oncologic procedures like radical hysterectomies, bowel and urologic surgery, as well as minimal access surgery such as Da Vinci robotic surgery. The student will be instructed in the use of specialized instruments in female genital cancer, such as the LASER, LLETZ and the administration of chemotherapy.

Category: Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: Clerkship +  
Months Offered: All, (August – October may be restricted to OB declaring students)

**Course Description:** The student will participate in the expanded management of inpatient and outpatient gynecologic patients. The student's outpatient experience will include exposure to patients with common problems, as well as routine preventative care. The outpatient experience will also include exposure to ultrasound and colposcopy. The inpatient experience will consist of participation in the operating room, inpatient consults, and following assigned patients. Students will be responsible for their assigned patients.

**Transgender Health Longitudinal Elective**  
**OBN 5018**  
Category: Non-Clinical/Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator  
Eligible: Clerkship +  
Months Offered: June – July; course covers 9-12 months of longitudinal experience.  
Students must register for a specified month.

Course Description: This course will provide the student with in-depth exposure to the field of transgender medicine and transgender genetics research. The student will see patients at the Augusta University Transgender Health Clinic and at the Equality Clinic. The expectation will be that the student will attend a minimum of 50% of each of these clinics over the course of the year (minimum of 6 Transgender Health Clinics and 12 Equality Clinics). Students will be exposed to various aspects of transgender medicine, including primary and preventive care, mental health care, and gender-affirming treatments and procedures. The student will also work with the Transgender Health Faculty in the genetics lab and will assist with enrolling/consenting patients into research studies. With the goal of a poster presentation and the potential to be included in relevant publications.

**Advanced Psychiatry Externship**

*PSRY 5045*

Category: Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: Clerkship +  
Months Offered: all

**Course Description:** This course is designed for students interested in Psychiatry to prepare them for internship. During the rotation, students will collaborate as a member of an interprofessional team and demonstrate ability to act as primary clinician for patients under attending supervision. They will be expected to demonstrate proficiency in conducting initial assessments and evaluations and to distinguish appropriate psychopharmacological, somatic treatments, and psychotherapy for psychiatric disorders.

Radiation Oncology

Radiation Therapy Externship  
RONC 5006  
Category: Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: Enrichment Only  
Months Offered: all  

Course Description: The student will participate in tumor conferences at the various hospitals and also attend the radiation therapy cancer clinics in order to gain experience in the workup and general management of the cancer patient in the areas of curative therapy, palliation, and supportive care. The student will be afforded an opportunity to see a large variety of tumors treated with various modalities of radiation therapy.

Radiology

Radiology Externship
RADM 5001
Category: Clinical
Classification: 4 Weeks
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: All
Months Offered: all

Course Description: Students rotate through most of the major areas of radiology, participating in the clinical diagnostic process. In addition to clinical rotations, lectures and case conferences are scheduled throughout the rotation. The student will learn appropriate ordering of radiology studies, radiation safety, and to recognize certain basic radiographic signs and patterns; however, it is not intended that students will be able to “read” a radiograph at the end of the elective.

Assessment: ☒ Faculty/Resident Evaluation ☒ Test/Quiz ☒ Presentation
☐ Other:

Pediatric Radiology Externship
RADM 5003
Category: Clinical
Classification: 4 Weeks
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: All
Months Offered: all

Course Description: This course is designed for students who have an interest in Diagnostic Radiology, Pediatrics, or Family Medicine. The four-week rotation will include exposure to radiography, fluoroscopy, CT, ultrasound, and MRI of the pediatric patient. The student will primarily spend time in the diagnostic reading area interpreting images with the pediatric radiologists along with some didactic lectures. The student will learn appropriate ordering of radiology studies, radiation safety, and to recognize certain basic radiographic signs and patterns; however, it is not intended that students will be able to “read” a radiograph at the end of the elective.

Assessment: ☒ Faculty/Resident Evaluation ☒ Test/Quiz ☒ Presentation
☐ Other:

Advanced Diagnostic Radiology Externship
RADM 5004
Category: Clinical
Classification: 4 Weeks
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: All, but RADM 5001 is a prerequisite if the student has declared diagnostic radiology
Months Offered: all

Course Description: This course is designed for students who have an interest in Diagnostic Radiology or specialties that would benefit from a more specialized focus in radiology such as Neurology, Neurosurgery, General Surgery, and Orthopedics. The student chooses from Neuroradiology, Musculoskeletal Radiology, and Abdominal Imaging as their focus for this four-week elective with exposure to multiple modalities of diagnostic imaging in these subspecialties.

**Vascular/Interventional Radiology Externship**

**RADM 5007**

Category: Clinical  
Classification: 4 Weeks  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: All, (RADM 5001 is a prerequisite if the student has declared diagnostic radiology)  
Months Offered: all

**Course Description:** The student will work with interventional radiologists in the performance of vascular and interventional procedures. Sufficient time will be allowed for studying the teaching file and participating in similar learning activities. Students will assist with patient preparation and monitoring, write clinical workups, observe procedures, and assist in preparation for case conferences.

Neurosurgery Externship and Research

SURG 5203
This Course Requires a Surgery Research Form to accompany the MCG Add Course Form. Please see curriculum webpage - https://www.augusta.edu/mcg/coffice/phase3.php
Category: Clinical
Classification: 4 Weeks
Contact: Department Faculty, Clerkship Coordinator, Regional Campus Coordinator
Eligible: Clerkship +
Months Offered: all

Course Description: This course combines direct patient care responsibilities of a junior house officer with practice in performing neurological examinations and participating in neurosurgical therapy. Students will simultaneously participate in a limited neurosurgical clinical research project. Projects may be initiated/suggested by the student or students may elect to participate in an ongoing faculty research project. Patient care responsibilities will be limited to five or six patients. Elective is individually arranged by the student and the faculty member supervising the project. IRB projects require prior approval. Approval may take up to 90 days.
