General Information

Requirements for Completion of Phase 3

A. General Requirements
   1. Students must satisfactorily complete all requirements for Phase 2 before entering Phase 3.
   2. The minimum Phase 3 requirement for graduation from the Medical College of Georgia, is the satisfactory completion of the 3rd and 4th year clerkships, the 2 selectives, and 4 electives.

B. Required Junior Clerkships
   1. Medicine 5000 – 8 weeks
   2. Neuroscience 5000 – 4 weeks
   3. Obstetrics & Gynecology 5000 – 6 weeks
   4. Pediatrics 5000 – 6 weeks
   5. Psychiatry 5000 – 4 weeks
   6. Surgery 5000 – 8 weeks
   7. Family Medicine 5000 – 6 weeks
   8. Medicine 6000 - 2 weeks

C. Required Senior Year Courses
   1. Clerkships: All students are required to complete the following two clerkships:
      GMED 5077 - Ambulatory Care Clerkship
      EMED 5001 – Emergency Medicine
   2. Selectives: All students are required to complete a sub-internship selective and a critical care selective.

Selectives are only available to students who have completed their junior core rotation requirements.

The following is a list of courses which qualify for the respective selective requirements. Please note that courses not listed below do not count toward the requirements.

a. Sub-Internship:
   1. FMPC 5003 – Family Medicine Sub-I
   2. GMED 5011 – Medicine Sub-I
   3. NEUR 5001 – Adult Neurology Sub-I
   4. NEUR 5009 – Child Neurology Sub-I
   5. OBGN 5009 – OB/Gyn Sub-I
   6. PEDS 5001 – Neonatal Sub-I
   7. PEDS 5009 – Pediatrics Sub-I
   8. SURG 5007 – Surgery Sub-I
   9. SURG 5016 – Surgery Sub-I for Military Students

b. Critical Care:
   1. ANES 5015 – Anesthesia Critical Care
   2. GMED 5034 – Medical Critical Care
   3. NEUR 5010 – Neurology Critical Care
   4. PEDS 5001 – Neonatal Critical Care
   5. PEDS 5018 – Pediatric Critical Care
   6. SURG 5005 – Surgery Critical Care/Trauma

c. PEDS 5001 can count as a Critical Care Selective or Sub-Internship but not both.

d. After fulfilling the selective requirement, students may take any course from the same selective list other than the one already taken, and count it as an elective

3. Electives:
   • Senior students must successfully complete a minimum of three electives. If a student did not complete a third year elective, then a fourth elective is required in the senior year to fulfill graduation requirements.
   • At least one of the three electives done in the fourth year must be on campus (two for students required to take 4 4th year electives)
   • Because electives provide students the opportunity to broaden their training, students are encouraged to complete more than the minimum of 3 electives.

   Course Classification System for Electives
   • Class 1: an unlimited number of these courses may be taken for credit
   • Class 2: only one Class 2 course may be taken for credit
   • Research: only one Research course may be taken for credit
   • International: only one International course may be taken for credit
Registering for Rotations

A. General Information:

1. In order to be officially enrolled into any selective or elective, students must submit the completed appropriate course form to the Curriculum Office. In addition, 4th year students must submit a completed scheduling worksheet to the Curriculum Office by the start of the academic year.

2. Students must be enrolled in a course prior to starting in order to receive credit. We cannot provide retroactive credit for courses if you are not properly enrolled.

3. Malpractice: You must be officially enrolled in a course to be covered by malpractice.
   a. In Georgia, no student who engages in the practice of medicine under the supervision of a medical facility, academic institution, or doctor of medicine, as a part of an academic curriculum leading to the award of a medical degree, shall be liable for any civil damages as a result of any act or omission in such practice of medicine, except for willful or wanton misconduct.” (Georgia Code 1981, section number 51138, Effective date: July 1, 1987)
   b. In the United States but NOT in Georgia, students officially enrolled at MCG are covered by Professional Liability Insurance while at U.S. institutions out of the state of Georgia.

B. Course Forms

1. The appropriate course form should be completed in order to enroll in selectives and electives. Copies of these forms can be found on the Curriculum Office home page.

2. There are 4 types of course forms:
   a. Add Form: use for all MCG sponsored courses on all campuses
   b. Off Campus Elective Form: use for all off-campus electives inside the United States
   c. Drop Form: use for all electives, selectives, and 4th year clerkships regardless of campus

3. After completion of the student portion of the form, students should submit via email the form to the appropriate location (explained on the form) for approval. Please note that completed forms must be submitted by email in order to maintain an accurate record of the submission.

4. Students are not officially enrolled until the completed form is then forwarded to the Curriculum Office.

Dropping and Adding Electives

A. Dropping Courses

1. All electives on the Augusta campus, except continuous electives, may be dropped any time prior to three weeks from the start date of the elective.

2. Clerkships and selectives on all campuses as well as electives outside Augusta (except continuous electives) may be dropped prior to six weeks from the start of the course.

3. Continuous Electives: Electives delivering instruction over a period longer than one month (examples: EMED 5008 and MEDI 5012) must still be registered for specific block on a student’s schedule even though instruction may begin before or end after the dates of the block in which the course is registered. Because of this unique scheduling aspect, these courses must be dropped by September 1 of the academic year in which the course is scheduled.

4. Without special permission from the Curriculum Office, courses may not be dropped after the deadline. After the deadline, students are required to withdraw from a course and will not be allowed to sign up for any course during that month. In addition, the withdrawal will be recorded on the student’s transcript as a “W”.

B. Adding Courses

1. Courses may be added to the schedule at any time up to the beginning of the course as long as the student has an open month and has obtained approval from the appropriate department or institution.

2. Gaining approval from the department and/or institution may involve verifying that there is sufficient room in the course, receiving permission from the sponsoring faculty, and completing all necessary paperwork for the course in a timely fashion (including anything required by the hosting facility).

Please post the Drop/Add schedule in a prominent location and take it seriously!

Except for extraordinary circumstances, the above policy will be strictly enforced.
Course Listings

C. The following pages list all of the selective and elective courses available through the Medical College of Georgia. Each listing contains the course title, course number, course category, course classification (see description above), contact person, months offered, and a brief description of the course.

D. Each course description also has an eligibility listing, which refers to the course prerequisites. Courses listed as “All” have no prerequisites and can be taken by all students. Courses listed as “4th Year Only” can be taken only by students who have completed all 3rd year clerkships. Courses listed as “3rd Year plus clerkship” may be taken by any student who has completed the clerkship within that department – in other words all 4th year students and 3rd year students once they have completed the clerkship in the department offering the elective. Note that 3rd Year students can find a list of courses which are open to them on page 56 of this bulletin. A few courses have additional requirements which are listed in this category as well.

E. The first pages of the bulletin list the courses which fulfill the selective requirements. Courses not listed in this section do not fulfill these requirements. As mentioned above, if a student wishes to take another course from the selective lists, s/he may do so and count that course as an elective.

F. With few exceptions, course locations are not included in the course listing. Most of the listed courses are available on the Augusta campus. Many of the courses are also offered on the various regional campuses as well. For information about courses on the Augusta campus, please check with the sponsoring department. For information about courses on the regional campuses, please check with the corresponding regional campus office.

G. All courses listed are subject to the availability of faculty and resources. Because of lack of available faculty or other resources, some courses may not be offered at a given time even though they are listed in the bulletin. Check with the sponsoring department for more information about which courses are available currently.
Selectives
Critical Care Selective

Anesthesia Critical Care

ANES 5015
Category: Critical Care
Classification: Selective
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 4th Year Only
Maximum Enrollment: 4
Months Offered: August - May

Course Description: This course is designed to educate and expose students to the general medical principles and management of critically ill surgical patients in the Intensive Care Unit environment. Students will participate in daily rounds with the critical care team following one to two patients per day. In addition students will participate in procedural interventions.

Assessment: ☒ Faculty/Resident Evaluation ☒ Test/Quiz ☐ Presentation ☐ Other:

Neurology Critical Care

NEUR 5010
Category: Critical Care
Classification: Selective
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 4th Year Only
Months Offered: all

Course Description: This is a patient care elective. The student will have primary care responsibilities for a group of patients in the Neurological Critical Care Unit. The student will participate in rounds and conferences and will assist with the diagnostic procedures involving his/her patients. The course is designed to give students a firm grounding in the care of neurological patients in the critical care setting.

Assessment: ☒ Faculty/Resident Evaluation ☐ Test/Quiz ☐ Presentation ☐ Other:

Medical Critical Care

GMED 5034
Category: Critical Care
Classification: Selective
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 4th Year Only
Months Offered: all

Course Description: This elective is designed to provide an intensive experience in critical care medicine. Emphasis is placed upon clinical evaluation and management of critically ill patients: mechanical ventilatory support, hemodynamic and ventilatory monitoring and other critical care interventions. Didactic sessions, conferences and teaching rounds provide a broad view of clinical approaches to critically ill patients.

Assessment: ☒ Faculty/Resident Evaluation ☐ Test/Quiz ☐ Presentation ☐ Other:

Neonatal Critical Care

PEDS 5001
Category: Critical Care
Classification: Selective
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 4th Year Only
Months Offered: all

Course Description: Each day will involve patient care in the NICU. Students are expected to follow a minimum of 2-3 patients or 2/3 the load of interns on the team and work 4 nights on the Night Team and 2 weekend days. Students will also attend daily formal lectures and teaching rounds. The rotation is designed to help senior students develop the skills to gain clinical and technical competency in Neonatal-Perinatal Medicine.

Assessment: ☒ Faculty/Resident Evaluation ☐ Test/Quiz ☐ Presentation ☐ Other:
**Pediatric Critical Care**  
**PEDS 5018**  
Category: Critical Care  
Classification: Selective  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: 4th Year Only  
Months Offered: all

**Course Description:** This rotation is designed to teach students to assist in the care of critically ill children and develop a multiple organ systems approach for evaluation and treatment. Activities include evaluation of newly admitted patients to the pediatric intensive care unit, development of multiple organ systems-based evaluation and management plans on all patients, provision of daily organ systems-based written documentation on the progress of all their patients, and making oral presentations on rounds to the attending and other team members. Students will be required to work 4 consecutive nights on the Night Team and 2 weekend days.

**Assessment:** ☒ Faculty/Resident Evaluation

☐ Other:

**Surgery Critical Care/Trauma**  
**SURG 5005**  
Category: Critical Care  
Classification: Selective  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: 4th Year Only  
Months Offered: all

**Course Description:** During this course students will be involved in the care of patients on the Trauma Service. These patients frequently have injuries and functional disruption of multiple organ systems, and therefore offer an opportunity in learning complex trauma and critical care management. Neurological, cardiovascular, pulmonary, and renal physiology are stressed and the frequent ultrasound, intracranial pressure monitoring, invasive cardiovascular monitoring, and mechanical ventilatory support provide extensive experience in care of the critically ill. Students will be an active member of the trauma team.

**Medicine Sub-I**

**GMED 5011**

Category: Sub-I  
Classification: Selective  
Contact: Clerkship Coordinator, Regional  
Campus Coordinator  
Eligible: 4th Year Only  
Months Offered: all

Course Description: Students taking the acting internship will essentially function as an intern on the team, admitting patients in sequence with the interns and working directly under the resident. Acting interns will be expected to attend all conferences the interns attend. The acting intern will complete the initial work up and determine the treatment plan in conjunction with the resident. The acting intern will function as the primary care physician for his/her patients but will be closely supervised in all activities by the resident and attending faculty physician. The acting interns on call schedule will be identical to that of the ward team.

Surgery Sub-I
Surg 5007
Category: Sub-I
Classification: Selective
Contact: Clerkship Coordinator
Eligible: 4th Year Only
Months Offered: all

Course Description: During this course students will function as substitute interns on a surgical service. Students will be assigned a specific surgical service and will function as an integral part of that service. The student is expected to initiate the clinical data base, begin diagnostic measures, and where possible, perform surgical procedures with supervision. In addition he/she will participate in the teaching responsibilities, conferences, clinics, and operating experiences of the service to which he/she is assigned and he/she will be assigned night call responsibilities. Surgical services include MIDDs Surgery, Pediatric Surgery, Vascular Surgery, Transplant Surgery, Surgical Oncology, Acute Care Surgery, VAMC Surgery, Plastic Surgery, Neurosurgery, Otolaryngology, Orthopedics and Urology.

Assessment: ☒ Faculty/Resident Evaluation

**Anesthesiology and Perioperative Medicine**

**Anesthesiology Research**

**ANES 5002**

- **Category:** Research
- **Classification:** Research
- **Contact:** Carol Dickerson, Research Manager
- **Eligible:** All
- **Months Offered:** all, by arrangement

**Course Description:** This course is designed to introduce the student to scientific discovery, experimental design, methodology, and data analysis. Our research faculty studies different aspects of sickle cell disease. These areas include the development of gene correction technologies, regulation of hemoglobin expression, cell adhesion, lung injury, and pain research. Our projects are translational in nature, i.e. we use basic science tools and preclinical animal models to study clinically relevant questions.

**ANES 5014**

Category: Clinical  
Classification: 1  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: All  
Maximum Enrollment: 25 (Minimum 5)  
Months Offered: July - April  

**Course Description:** This course is designed to help students develop the skills necessary to treat patients with respiratory insufficiency, manage a patient in need of mechanical ventilation or other respiratory therapy modalities as indicated. In addition, students should be able to provide adequate BLS and ACLS to patients in a “Code Blue” situation. Students attend class for 4 weeks covering the basic concepts of respiratory pathophysiology concentrating on mechanical ventilation. This is achieved through a combination of lecture, hand-on demonstration, and weekly quizzes. Students will also be expected to give a presentation.

Dermatology Off-Campus Externship
DERM 5002

This course requires application using VSAS or other arrangements made by the student.

Off-Campus Add Form Required

Category: Clinical
Classification: Off Campus
Contact: Clerkship Coordinator
Eligible: 4th Year ONLY after taking DERM 5001
Months Offered: all

Course Description: Students will learn dermatology and dermatopathology in a variety of inpatient and outpatient settings depending on the structure of the chosen rotation.

Assessment: ☒ Faculty/Resident Evaluation ☐ Test/Quiz ☐ Presentation ☐ Other:

Advanced Dermatology

DERM 5003
Category: Clinical
Classification: 1
Contact: Clerkship Coordinator
Eligible: 4th Year ONLY after taking DERM 5001
Months Offered: all

Course Description: This elective is designed for students who plan to enter Dermatology residency training. Like students in the 5001 course, participants will see patients at the MCG Hospital and Clinics as well as in the VAMC Dermatology Clinic. Students will participate in Dermatopathology teaching conferences, Morphology Conferences, Grand Rounds, Basic Science teaching conferences, and Journal Club. Supervision will be provided by the dermatology faculty and house staff.

In addition students in this course will be given more opportunity to participate in Dermatology research and scholarly projects.

**EMED 5002**

Category: Clinical  
Classification: 1  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: 4th Year ONLY after taking EMED 5001  
Months Offered: all  

Course Description: This rotation is designed for students interested in Emergency Medicine as a career to give them a chance to work more closely with EM faculty. Students will serve as externs in the Emergency Department seeing patients under the direct supervision of EM faculty. Students will assume the primary medical care responsibilities for patients and work independent of EM resident input. Students will also present a lecture during weekly EM grand rounds. Students will rotate on a local ambulance service for two shifts.

**Emergency Medicine Research**

**EMED 5004**

Category: Research  
Classification: Research  
Contact: Dr. Jim Wilde, Clerkship Coordinator, Regional Campus Coordinator  
Eligible: All with faculty approval  
Months Offered: by arrangement  

Course Description: Students will choose a research topic with the aid of the department research director, who will match them to an appropriate faculty member within the Department of EM. The students will perform a literature search and produce a short written research proposal for approval by the Human Assurance Committee. With the aid of the faculty advisor and a research statistician, the student will conduct the research project, analyze the data, and create a one paragraph abstract describing the research findings. In some cases the department may have well developed research projects that require additional assistance. These projects may also be undertaken to fulfill the requirements of the elective.

**Emergency Medicine Off-Campus Externship**

**EMED 5005**

This course requires application using VSAS or other arrangements made by the student.  

Off-Campus Add Form Required  

Category: Clinical  
Classification: Off Campus  
Contact: Clerkship Coordinator  
Eligible: 4th Year ONLY after taking EMED 5001  
Months Offered: all  

Course Description: Teaching materials will be provided by the chosen facility. The rotation should provide ample clinical experience, patient contact, and procedures. Some sites may have dedicated procedure practice sessions. Clinical instruction in the initial evaluation and stabilization of the acutely ill and injured patient should be provided by working alongside Emergency Medicine faculty (and possibly residents) who are present 24 hours a day. Students should work a variety of shifts including days, evenings and nights, including some weekends.

**International and Travel Medicine**

**EMED 5007**

Apply Through Study Abroad – Terra Dotta System  

Category: Clinical  
Classification: International  
Contact: Dr. Dan Kaminstein, Curriculum  
Eligible: All, but completion of 3rd year recommended  
Months Offered: by arrangement  

Course Description: This will be a supervised clinical experience with students engaging in patient care under the direct supervision of faculty trained and familiar with travel medicine, clinical tropical medicine, and medicine in the developing world. Opportunities exist ranging from hospital-based experience to remote mobile villages and clinics. Students may join MCG faculty on a planned trip anywhere in the world (typically 10-14 days), or arrange their own experience to a site where they will be supervised. A number of lectures and reading materials are required as appropriate to traveling in developing nations. Some six months planning and interaction with the course director/team leader must occur before the beginning of the rotation month to begin vaccinations, plan travel and organize supplies. Students will be responsible for all costs, e.g. airfare and ground expenses.

As an elective for credit toward graduation from medical school, it is inherent that the experience have significant medical educational content; e.g a foreign language immersion class will not be approved unless there is patient contact to practice those skills.

Although this course has an Emergency Medicine course number, the course does not have to be an EM experience. The course can cover any specialty.
Special Circumstances: In addition to the usual Curriculum Office paperwork, all sites and travel arrangements must be approved by the Director of Global Health (Dr. Kaminstein), the University Study Abroad Office, and the Curriculum Office. This review may include a review of visa requirements and personal safety issues (travel, food, water, diseases, and vaccinations). Please allow at least 6 months for the approval process. Per MCG Policy, a site in any country with a travel warning from the US State Department (http://travel.state.gov/content/passports/english/alertswarnings.html) will not be approved, and approval may be rescinded at any time if changes happen.

Emergency Ultrasound
EMED 5008
Category: Clinical  
Classification: 1
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 4th Year Only
Months Offered: September – March; even though the course covers 7 months students must register for the course in one month

Course Description: This course will consist of 7 months of instruction and hands-on practice. The initial course begins in July lasting 16 hours over 2 days and includes lectures and hands-on practice with human models. Each month thereafter consists of a two hour lecture and discussion and two eight hour shifts in the ED practicing EUS skills. Required readings will be provided. It is recommended that the student take EMED 5001 during July in order to be available for the 16 hour course. The student will work one-on-one with one of the course directors to practice ultrasound skills while in the emergency department. Students may spend more time with the instructor during each month, but two 8 hours shifts are required. If more than 3 people apply for the course, selection will be made based on completion of the requirements and an interview.

Assessment:  ☒ Faculty/Resident Evaluation  ☐ Test/Quiz  ☐ Presentation  ☐ Other: written summary

Rural Emergency Medicine
EMED 5013
This course does not replace the Emergency Medicine Clerkship. Students must still take EMED 5001.
Category: Clinical  
Classification: 1
Contact: Regional Campus Coordinators
Eligible: 3rd Year 2nd Semester
Months Offered: all

Course Description: The schedule includes approximately 34-36 hours of patient contact per week. Students will spend at least one session with a triage nurse in the ED. Students will ride one shift with EMS and one with paramedics during this rotation. Students will work a variety of shifts.

Assessment:  ☒ Faculty/Resident Evaluation  ☐ Test/Quiz  ☐ Presentation  ☐ Other: written summary

Emergency Medical Services
EMED 5014
Category: Clinical  
Classification: 1
Contact: Athens Campus Coordinator
Eligible: 4th Year Only
Months Offered: all
Note: this course is currently offered only on the Athens campus

Course Description: The course is designed to give students a better understanding EMS systems. Students will get experience with EMS administration and operations, on-line and off-line medical control, and disaster medicine. Students will also gain experience with the prehospital assessment and transport of patients by participating in ride-alongs with paramedics in the field.

**Health Policy and Advocacy**  
*FMPC 5020*

**Category:** Other  
**Classification:** 1  
**Contact:** Clerkship Coordinator, Regional Campus Coordinator  
**Eligible:** All  
**Months Offered:** all

**Course Description:** The course will engage students in researching key health policy topics and developing advocacy strategies to influence policy in these areas. Students will be engaged in discussions about required readings, literature reviews, and data analysis. Group discussions and small group work will be utilized to complete tasks. Sometimes group members may include full time faculty / staff assigned to certain topics and other times groups may be composed of solely students with a faculty lead. Students will required to conduct extensive literature reviews and acquire latest research findings in topic area of interest, develop and participate in advocacy strategic planning, and develop and scholarly work products (e.g. fact sheets, position white papers, resolutions, etc.) and utilize these as indicated with various advocate groups.

**Population Health/Business in Medicine**  
*FMPC 6000*

**Category:** Other  
**Classification:** 1  
**Contact:** Clerkship Coordinator  
**Eligible:** All  
**Months Offered:** All

**Course Description:** Students will rotate with the AU population health department in order to gain an understanding of the new models of health care. This will be an interdisciplinary four-week elective during the fourth year of medical school. Medical students will work with the population health team, pharmacy students, Nursing/DNP students, Physician Assistant (PA) students and other members of the healthcare team. The goal of the four-week elective would be for the students to identify and solve real problems facing hospitals and clinics today. Students will understand why the payment structure for healthcare is shifting from fee for service to pay for performance or Value Based Care. Students will understand and be able to explain key terms such as Population Health, Per Member per Month (PMPM), Share Savings, Hospital Value-Based Purchasing Program (VBP), Pay for Performance (PAP), and the Medicare Access Chip Reauthorization Act of 2015 (MACRA) or the Quality Payment Program (QPP). The students will gain a deeper understanding of the transformation of healthcare to meet the Quadruple Aim of the Institute of Healthcare Improvement (IHI), which is improving the patient experience of care, improving the health of populations, reducing the per capita cost of health care, and improving healthcare wellness.

**Food as Medicine: An Elective Addressing Diet-Related Illnesses Affected by Poverty**  
*FMPC 6004*

Category: Other  
Classification: 1  
Contact: Clerkship Coordinator  
Eligible: All  
Months Offered: All

**Course Description:** Students will gain a first-hand understanding of the barriers to health – especially as they influence diet – in an impoverished urban neighborhood. Attend nutrition education lectures, help conduct and attend nutrition-based cooking classes with a professional chef during the month, attend a bariatric information session with a health psychologist, work with members of the American Culinary Federation and Augusta District Dietetic Association, and conduct a home-based study of one or two families to analyze the connections between poverty and diet-related illnesses.
**Rheumatology Externship**  
*GMED 5010*

**Category:** Clinical  
**Classification:** 1  
**Contact:** Clerkship Coordinator, Regional Campus Coordinator  
**Eligible:** 4th Year Only  
**Months Offered:** all

**Course Description:** Supervised by attending physicians, students will participate in primarily outpatient consultations, participate in teaching conferences, gain experience in pertinent diagnostic procedures, evaluate and follow patients in the faculty practices, and learn pathophysiology, differential diagnosis, clinical manifestations, management, and therapy of rheumatology.

**Medical Education**

**MEDI 5012**

- **Category:** Teaching
- **Classification:** 1
- **Contact:** Dr. Anna Edmondson
- **Eligible:** All with faculty approval
- **Months Offered:** August through April

**Course Description:** The course provides students with a foundation in the principles of medical education. It allows students to tailor the experience to fit their chosen specialty and career path. It is composed of three different components: core medical education curriculum, teaching and scholarship. These components consist of both required offerings and voluntary sessions, which students will choose from in order to fulfill the requirements. Students will engage with material from relevant underlying “methods” disciplines from the learning sciences, including topics such as selection of research subjects, alignment of learning objectives with activities and assessments, active learner engagement, and so forth. The main clinical or science content will be selected by the student and the invited teaching faculty to be most relevant to the student’s chosen field.

**Assessment:**
-Faculty/Resident Evaluation
- Test/Quiz

- Other: Scholarly project; reflections

**Point of Care Ultrasound**

**MEDI 5013**

- **Category:** Teaching
- **Classification:** 1
- **Contact:** Dr. Becky Etheridge
- **Eligible:** 4th Year Only
- **Months Offered:** July through April

**Course Description:** The goals of this course are to promote Point-of-Care ultrasound technology as a clinical skills tool to enhance the educational experience of students with basic science content and to transform basic knowledge and student’s experience with ultrasound technology to enable readiness to incorporate Point-of-Care ultrasound into clinical practice. The course is designed to help students recall key information concerning introductory ultrasound topics including history of ultrasound technology, basic ultrasound physics principles, screen orientation, scan techniques, and machine knobology. Students will also learn to recognize common ultrasound applications and appropriate indications, pre-exam activities, patient preparations, and common scanning protocols and will demonstrate introductory scanning skills through hands-on scanning labs.

**Assessment:**
- Faculty/Resident Evaluation
- Test/Quiz
- Presentation
- Other: Image interpretation, scanning

**Simulation Education Elective**

**MEDI 6001**

- **Category:** Teaching
- **Classification:** 1
- **Contact:** Dr. A.J. Kleinheksel
- **Eligible:** All
- **Months Offered:** September – November, February – April

**Course Description:** This elective is designed to develop the knowledge and skills of students with interests in academic medicine and educational research, as well as students who intend to apply for one of the medical simulation fellowships offered across the country. During the elective, students will learn about the theories supporting the use of simulation in education, apply best practices to the development of simulation cases, effectively use simulation technologies, and contribute to educational simulation scholarship.

Category: Clinical
Classification: 1
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 3rd Year plus Clerkship
Months Offered: all

Course Description: This is a clinically oriented block of time during which the student will participate in the antepartum, and outpatient care of high-risk obstetric patients. Responsibilities are similar to those of a sub-intern working closely with the OB faculty and house-staff when house-staff are present. The student will also present cases at the clinical conferences dealing with high-risk pregnancies, and be responsible for any assigned reading material. The student will make an in-depth presentation on topic to be determined at the beginning of the rotation.

Reproductive Endocrinology Externship
OBGN 5006

Category: Clinical
Classification: 1
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 3rd Year plus Clerkship
Months Offered: all (August – October may be restricted to OB declaring students)

Course Description: The student will participate in the Reproductive Endocrinology and Genetics Clinic. Students will be involved in day-to-day management of infertility in cycling patients including ultrasound, intrauterine insemination, in vitro fertilization, and reproductive preserving surgery. The student will see complex endocrine and genetics patients directly under faculty supervision, and will present patients at the weekly clinical conference. There will also be exposure to the weekly research conference.

Gynecologic Oncology Externship
OBGN 5007

Category: Clinical
Classification: 1
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 3rd Year plus Clerkship
Months Offered: all (August – October may be restricted to OB declaring students)

Course Description: The student will participate in all aspects of gynecologic oncology within a high volume GYN ONC practice. Involvement includes participation in work up, treatment and follow-up with comprehensive care inclusive of associated physical and mental health issues. He/she will also be exposed to a high volume of surgery from routine hysterectomies to complex oncologic procedures like radical hysterectomies, bowel and urologic surgery, as well as minimal access surgery such as Da Vinci robotic surgery. The student will be instructed in the use of specialized instruments in female genital cancer, such as the LASER, LLETZ and the administration of chemotherapy.

**Benign Gynecology Externship**  
**OBGN 5008**

Category: Clinical  
Classification: 1  
Contact: Clerkship Coordinator, Regional  
Campus Coordinator  
Eligible: 3rd Year plus Clerkship  
Months Offered: All, (August – October may be restricted to OB declaring students)

**Course Description:** The student will participate in the expanded management of inpatient and outpatient gynecology patients. The student’s outpatient experience will include exposure to patients with common problems, as well as routine preventative care. The outpatient experience will also include exposure to ultrasound and colposcopy. The inpatient experience will consist of participation in the operating room, inpatients consults, and following assigned patients. Students will be responsible for their assigned patients.

**Radiation Therapy Off-Campus Externship**

**RONC 5008**

This course requires application using VSAS or other arrangements made by the student.  

**Off-Campus Add Form Required**

Category: Clinical  
Classification: Off Campus  
Contact: Clerkship Coordinator  
Eligible: 4th Year Only  
Months Offered: all

**Course Description:** This elective is designed for the student who is considering pursuit of a radiation oncology residency and who would like to obtain additional and varied experiences in the field.

Assessment: ☒ Faculty/Resident Evaluation  
☐ Test/Quiz  ☐ Presentation  
☐ Other:
**Radiology**

**Radiology Externship**

**RADM 5001**
Category: Clinical  
Classification: 1  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: All  
Months Offered: all  

Course Description: Students rotate through most of the major areas of radiology, participating in the clinical diagnostic process. In addition to clinical rotations, lectures and case conferences are scheduled throughout the rotation. The student will learn appropriate ordering of radiology studies, radiation safety, and to recognize certain basic radiographic signs and patterns; however, it is not intended that students will be able to “read” a radiograph at the end of the elective.

**Pediatric Radiology Externship**

**RADM 5003**
Category: Clinical  
Classification: 1  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: All  
Months Offered: all  

Course Description: This course is designed for students who have an interest in Diagnostic Radiology, Pediatrics, or Family Medicine. The four-week rotation will include exposure to radiography, fluoroscopy, CT, ultrasound, and MRI of the pediatric patient. The student will primarily spend time in the diagnostic reading area interpreting images with the pediatric radiologists along with some didactic lectures. The student will learn appropriate ordering of radiology studies, radiation safety, and to recognize certain basic radiographic signs and patterns; however, it is not intended that students will be able to “read” a radiograph at the end of the elective.

**Advanced Diagnostic Radiology Externship**

**RADM 5004**
Category: Clinical  
Classification: 1  
Contact: Clerkship Coordinator, Regional Campus Coordinator  
Eligible: 3rd & 4th Year Students (RADM 5001 is a prerequisite if the student has declared diagnostic radiology)  
Months Offered: all  

Course Description: This course is designed for students who have an interest in Diagnostic Radiology or specialties that would benefit from a more specialized focus in radiology such as Neurology, Neurosurgery, General Surgery, and Orthopedics. The student chooses from Neuroradiology, Musculoskeletal Radiology, and Abdominal Imaging as their focus for this four-week elective with exposure to multiple modalities of diagnostic imaging in these subspecialties.

Surgery Boot Camp
SURG 5380
Category: Residency Prep
Classification: 1
Contact: Clerkship Coordinator
Eligible: 4th Year Only and declaring Surgery as a
sponsoring department
Months Offered: March

Course Description: This elective has been specifically
designed for students entering a surgical residency. The
aim is to prepare the student with the basic surgical skills
and knowledge necessary to successfully begin their
PGY 1 year in surgical training. Activities that are part of
this course include surgical basic skills simulation
training, endoscopic skills simulation training,
laparoscopic skills training, attendance at surgical
conferences, presentation at tumor board, minor OR
procedures, and practice on-call telephone calls.

Neurosurgery

Neurosurgery Externship
SURG 5200
Category: Clinical
Classification: 1
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 4th Year Only
Months Offered: all

Course Description: This course provides opportunity for combining the direct patient care responsibilities of a junior house officer with practice in performing neurological examinations while participating with staff members in the practice of neurosurgery. The extern will be assigned eight patients for whom he will have primary responsibility for daily care under the supervision of the Neurosurgery faculty and house staff in locations where house staff are present. He/she will participate in patient evaluations in the clinic and daily teaching conferences. This elective provides for a close working relationship between the staff and the student while at the same time providing opportunity for patient care responsibilities. Note that this course does not meet the requirements of the Sub-I. Students wishing to take a Sub-I in Neurosurgery should use the SURG 5007 course with a focus in Neurosurgery.

Urology

Urology Externship
SURG 5350
Category: Clinical
Classification: 1
Contact: Clerkship Coordinator, Regional Campus Coordinator
Eligible: 3rd Year plus Clerkship
Months Offered: all

Course Description: This course is designed to provide students with the opportunity to rotate on a 4 week patient care elective in Urology. Emphasis is on evaluation of urologic patient, both the inpatient and outpatient. Students have an opportunity to assist at cystoscopies and several operative procedures. Opportunity to learn proper technique for urethral dilatations, urethral catheterizations and prostatic evaluation is available. Students are assigned inpatients in rotation and perform histories and physical examinations upon them and then follow the patient daily, including preoperative, operative and postoperative care. Students make ward rounds and review all urologic x rays daily. Informal conferences with faculty and/or residents are held covering such topics as G.U. malignancies, urolithiasis, prostatic disease, neurogenic bladder and complications of the catheter. Note that this course does not meet the requirements of the Sub-I. Students wishing to take a Sub-I in Urology should use the SURG 5007 course with a focus in Urology.
