Extended Study Week Policy

If a student does not meet the minimum requirements of a module/course in the pre-clerkship curriculum, they will be given an opportunity to retake the end of module exam or clinical progression assessment following a week of study immediately after the module ends. After this retake, if the student still does not pass the course, a grade of “U” will be entered for the course, and the Student Promotions Committee will determine remediation and/or progression through the remaining curriculum.
