A. PROFESSIONAL PROFILE

A cancer epidemiologist with vast skills and training in epidemiologic methodology, biostatistics, database design, geographical information systems (GIS), mediation analysis, and cancer prevention and control. Within the past five years, has published over 30 peer-reviewed (with 26+ as first or second author) research articles in the areas of cancer, sepsis, and chronic disease epidemiology. Strong trans-disciplinary background: currently investigating the interaction of race and place on health outcomes in sepsis and breast cancer.

B. CONTRIBUTIONS TO SCIENCE

- Examined racial and socio-economic disparities in cancer outcomes, particularly breast cancer.
- Investigated the role of personal health (baseline chronic medical conditions, physical health, and nutrition) and cancer risk among diverse US populations.
- Elucidated health disparities and long-term risk factors for sepsis using data from the large community dwelling REasons for Geographic and Racial Differences in Stroke (REGARDS)-Sepsis ancillary cohort study.
- My NCBI NIH Bibliography is located here:
