ABOUT THE PRIDE PROGRAM

The Programs to Increase Diversity Among Individuals Engaged (PRIDE) in Health-Related Research is an all-expense paid research career advancing opportunity funded by the National Heart, Lung and Blood Institute (NHLBI). This mentored research program will address the difficulties experienced by junior-level investigators in establishing independent research programs and negotiating tenure and full professor status at academic institutions. The desired outcome is to improve the recruitment and retention of faculty from a minority group that is under-represented in the biomedical or health sciences field. PRIDE promotes diversity in the workforce on a national basis and engages junior-level scientists in research efforts related to heart, lung, blood and sleep disorders.

For additional information visit us on the web at www.augusta.edu/pride or contact Betty S. Pace, MD Program Director bpence@augusta.edu Fax: (706) 721-7271

Augusta University is an equal opportunity/affirmative action university
The PRIDE Program hosted by Augusta University is designed to train junior faculty to do bench and clinical research related to hemoglobin and red blood cell membrane diseases. Functional and translational genomic approaches will be used to investigate mechanisms of globin gene regulation and proteomics to study the red blood cell membrane in health and disease. During the Institute, mentees will learn how to access public databases established by the Human Genome Project and to perform basic data mining procedures. The program objectives include:

- Providing fundamental hands-on bench research training by interdisciplinary faculty in the areas of genomics, cell and molecular biology and proteomics.
- Establishing mentor-mentee partnerships based on mutual research interests.
- Providing a grants workshop conducted by NHLBI staff to assist mentees with developing a research focus and to advise on identifying viable funding sources to promote a sustainable and independent research program for career advancement.
- Establish a peer-mentoring network to facilitate scientific collaboration, professional development, and social support.

**PRIDE PROGRAM OVERVIEW**

**Who may apply?**

Junior research faculty at accredited research institutions interested in research in health-related fields may apply. The final selection of participants will be based on merit, while also considering the potential of individuals, including those with backgrounds that are under-represented in the biomedical sciences, to increase diversity in the workforce on a national or institutional basis.

**What is the purpose of PRIDE?**

- To ensure that every United States citizen is provided an equal opportunity to gain the skills and knowledge necessary to compete in the scientific workforce and to enrich the quality of scientific discoveries to treat human disease by infusing intellectual diversity of perspective throughout the scientific enterprise.

**How does the PRIDE Program work?**

- PRIDE is an all-expense-paid training opportunity brings participants to Augusta University during 2-weeks for two summers; a visit to the mentor’s institution and annual workshop in Washington, DC at the National Heart Lung and Blood Institute.
- Mentor-mentee partnerships will be chosen based on 1) research interests, 2) mentor’s experience in research and grant writing, and 3) establishing long-term collaborations.
- The didactic curricula involve faculty and mentors from multiple disciplines with various levels of hands-on training.
- Special emphasis will be placed on the development of grantsmanship skills and specific research projects with mentors to improve fundability.

**Application Deadline: Applications for the 2021 PRIDE Cohort is April 30, 2021**

Go to: [https://redcap.wustl.edu/redcap/surveys/?s=C8TNPFWPKE](https://redcap.wustl.edu/redcap/surveys/?s=C8TNPFWPKE) to begin the application process for the 2021 Institute.

**PRIDE PROGRAM MENTORS**

Robert W. Gibson, PhD  
Emergency Medicine  
Augusta University

John D. Belcher, Ph.D.  
Vascular Biology  
University of Minnesota

Lindsey Cohen, Ph.D.  
Clinical Psychology  
University of Georgia

Patrick Gallagher, M.D.  
Pediatrics and Genetics  
Yale University

Juan Gonzalez, Ph.D.  
Molecular and Cellular Biology  
University of Texas at Dallas

Sandra Murray, Ph.D.  
Cell Biology  
University of Pittsburgh

Abdullah Kutlar, M.D.  
Adult Hematology  
Augusta University

Ryan Harris, Ph.D.  
Kinesiology  
Augusta University

Mohandas Narla, D.Sc.  
Red Cell Physiology  
New York Blood Center

Betty Pace, M.D.  
Biochemistry and Molecular Biology  
Augusta University

Kenneth Peterson, Ph.D.  
Biochemistry Molecular Biology  
University of Kansas

Rick McIndoe, Ph.D  
Obstetrics and Gynecology  
Augusta University

Joseph Telfair, DrPH, MPH  
Public Health  
Georgia Southern University

Marsha Treadwell, Ph.D.  
Hematology and Psychiatry  
Children’s Hospital Oakland

Lara Stepleman Ph.D  
Psychiatry & Health Behavior  
Augusta University

Claudia R. Morris, M.D.  
Emergency Medicine  
Emory University

Solomon Ofori-Acquah, Ph.D.  
Hematology/Oncology  
University of Pittsburgh

Maria Ferris, M.D.  
Renal Epidemiology  
University of North Carolina

Mitchell Weiss, M.D., Ph.D.  
Hematology  
St. Jude Research  
Children's Hospital

Steven Goodman, Ph.D.  
Pediatrics and Physiology  
University of Tennessee  
Health Sciences Center
