Please attach written work sample.

Please evaluate the resident’s work sample on the following rating scale (circle the appropriate number). You are encouraged to use the “comments” section following the evaluation items to qualify or elaborate your ratings.

1 Development Required: Further training and supervision is required to meet expectations.
2 Meets Expectations: Functions adequately to above average for level of training.
3 Exceeds Expectations: Functions exceptionally for level of training.

Resident Work Sample Ratings:

A. The work sample provided the key biopsychosocial data needed for the purpose of a clear formulation of the case.  
   1  2  3

B. The work sample provided an integration of the “data” in a manner that reflected a process of theory building at the individual patient level and in a manner consistent with the theoretical model used.  
   1  2  3

C. The work sample provided a treatment plan that fit the “theory of the patient” and constructed an intervention approach that integrated the idiographic aspects of the patient’s needs along with knowledge of empirically supported treatments.  
   1  2  3

D. The work sample directly addressed the pertinent cultural/diversity data and the impact of this data in guiding the conceptualization of the case and the development of the treatment plan.  
   1  2  3

E. The work sample reflected recovery based principles of mental health care as denoted by delineation of person centered goals,
identification of personal strengths, and assessment of the individual’s level of hope (self-efficacy and outcome expectancy).

F. The work sample reflected an integrative assessment/treatment model of health care problems in which there was an appreciation for the contributions that could be made by various health care disciplines in the care of the patient.

G. The work sample included documentation of empirical support for the treatment plan devised.

**Overall Performance**

[ ] Development Required: Further training and supervision is required to meet expectations for work sample.

Remediation Efforts Recommended:

_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

[ ] Meets Expectations: Functions adequately to above average for level of training

[ ] Exceeds Expectations: Functions exceptionally for level of training.

Justification for this exceptional rating:

_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
