STUDENT SELECTION:

ALL applicants should meet the following criteria:
- U.S. Citizenship or Permanent Resident Status
- Georgia residency
- Strong interest in the health science professions
- Strong competence in science and mathematics
- Extracurricular activities demonstrating leadership
- Underrepresented in the health sciences professions and/or educationally or economically disadvantaged

Intermediate College Applicants:
Completion of the following courses prior to start of summer program:
- Two semesters of general chemistry
- Two semesters of general biology
- Preference will be given to students who have taken a semester of organic chemistry
GPA Requirements:
Minimum overall GPA of 3.3; Minimum science GPA of 3.3

Advanced College Applicants:
Completion of the following courses prior to start of summer program:
- Two years of higher level biology
- Two years of chemistry (including two organic chemistry courses or one organic chemistry and one semester of biochemistry) Preference will be given to students who have taken biochemistry
- At least one semester of physics
GPA Requirements:
Minimum overall GPA of 3.3; Minimum science GPA of 3.3

SEEP is a highly intense academic program and requires a full-time commitment. Students accepted into the program must not commit to other programs or conflicting activities. SEEP credit course grades become part of participant’s academic record.

HOW TO APPLY:

1. Complete the online SEEP Application at: http://www.augusta.edu/mcg/students/seep
2. Submit official transcript(s). If you attended more than one college, a transcript from each is required. Transcripts from your college or transcript service should be emailed to SEEP@augusta.edu or mailed to the address below.
3. Your recommendations must come from a faculty, research mentor or advisor at the college you currently attend or attended. The people you select and list on your application will be sent a link to access the online recommendation form.
4. Upload supporting documents. Detailed instructions can be found at https://www.augusta.edu/mcg/students/seep

APPLICATION DEADLINES

March 8, 2021: Online application submission
March 12, 2021: Transcript, recommendations, and other supporting documents

2021 Summer Virtual Program

OFFICE OF STUDENT AND MULTICULTURAL AFFAIRS

SEEP College is a seven-week summer program with two levels: Intermediate College and Advanced College. Participants are assigned a SEEP level based on science prerequisite courses. Each track helps prepare students for a future career in the health sciences, with an emphasis on medicine, through an extensive academic program that includes: an advanced biomedical science course, an upper level critical thinking and clinical-based, problem-solving skills development component and pre-professional and personal development. Eligible students are selected through a competitive process, including academics, demonstrated interest in pursuing medicine or health profession, and motivation for success. Participants at these levels receive college credit for biomedical science courses offered in the program. There is no cost to participate in these programs. Participants receive a stipend to help with textbook cost and other program expenses.

MAY 28 - JULY 16, 2021
Mission and Vision:
The Medical College of Georgia’s Office of Student and Multicultural Affairs (OSMA) is dedicated to developing a diverse, culturally competent and empathetic physician workforce and providing leadership in diversity and cultural competence for MCG faculty, staff, students, residents and the surrounding community.

Goals of the OSMA Pipeline Programs:
• Enhance students’ competitiveness for medical school and other health profession programs. The program focuses on strengthening students’ academic performance, standardized admissions test-taking skills and pre-professional development.
• Increase the number of students from underrepresented, nontraditional and/or economically disadvantaged backgrounds choosing and entering careers in the health care professions.
• Identify and educationally prepare underrepresented and disadvantaged students for competitive entry into medical school, with focus on entry to and graduation from MCG.

SEEP Intermediate Coursework

<table>
<thead>
<tr>
<th>COURSE</th>
<th>COURSE DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biological Chemistry MEDS: 3000</td>
<td>An introductory course covering fundamental aspects of biochemistry, which emphasizes molecular biology, proteins, and intermediary metabolism, with a focus on medical biochemistry and its application to the field of medicine.</td>
</tr>
<tr>
<td>Health Disparities &amp; Inequities</td>
<td>This course seeks to expand students’ understanding of health disparities, health inequities, and the social determinants of health through cultural competence education.</td>
</tr>
<tr>
<td>Introduction to Evidence-Based Problem Solving</td>
<td>This course introduces students to the fundamental concepts and practices of dissecting and discussing clinical cases and scientific literature in small groups led by a facilitator. Special emphasis is placed on problem based learning, with interpretation of scientific and medical literature and application of the underlying concepts to novel situations, specifically in the area of health disparities.</td>
</tr>
<tr>
<td>Pre-Professional Development Seminar</td>
<td>These seminars provide information and strategies designed to contribute to students’ pre-professional development and success in attaining their desired educational and career goals. The seminars focus on learning skills and study strategies, stress and time-management, professionalism and cultural competency, as well as the development of the personal statement required in the health profession school admission process. In addition, students receive individual advising, and each student creates an individualized education plan that focuses upon the completion of their undergraduate degree in preparation for professional school.</td>
</tr>
<tr>
<td>Virtual Clinical Exposure</td>
<td>Students will be exposed to clinical simulations through problem-based learning activities led by faculty in the Augusta University Simulation Center.</td>
</tr>

SEEP Advanced Coursework

<table>
<thead>
<tr>
<th>COURSE</th>
<th>COURSE DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scientific Interpretation and Critical Thinking MEDS: 3000 2 semester credit hours</td>
<td>This course focuses on the fundamental concepts of critical thinking, specifically using them to understand, dissect, and evaluate scientific literature. Students apply the skills learned to novel scientific situations, emphasizing areas of health disparities.</td>
</tr>
<tr>
<td>Admissions Test Preparation Intense MCAT Prep</td>
<td>Pre-medical students participate in structured MCAT sessions, including participation in classroom MCAT prep along with online lessons and study sessions. These sessions include additional interactive review, paired problem-solving, group discussion, assigned quizzes, and practice problems.</td>
</tr>
<tr>
<td>Pre-Professional Development Seminar</td>
<td>Seminar sessions are designed to familiarize students with the health professional school admissions process. Topics discussed include health profession school entrance exam preparation, application timelines and completion, admissions procedures and application costs, interview skills, choosing recommendations effectively, and financial aid for health profession school.</td>
</tr>
<tr>
<td>Health Disparities &amp; Inequities</td>
<td>This course seeks to expand students’ understanding of health disparities, health inequities, and the social determinants of health through cultural competence education.</td>
</tr>
<tr>
<td>Virtual Clinical Exposure</td>
<td>Students will be exposed to clinical simulations through problem-based learning activities led by faculty in the Augusta University Simulation Center.</td>
</tr>
