

DNP

PHD

Program Goal:

Improve health outcomes by translating synthesized knowledge into practice.

Program Goal:

Augment the empirical and theoretical base of nursing practice through research.

Focus:

Practice

Focus:

Research

Course Work:

- Clinical practice
- Evidence-based practice
- Health policy
- Leadership

Course Work:

- Philosophy of science
- Theory constructs and analysis
- Research Methods
- Instrumentation and measurement

Final Project:

Practice focused project

Final Project:

Original research project

After Graduation:

- Clinical practice
- Administration
- Management
- Teaching

After Graduation:

- Research
- Teaching
