Student Opportunities at NASA

Dr. Alexander Tessler

NASA Langley Research Center, Hampton, Virginia

Date: February 8
Time: 2-3 PM
Place: Allgood Hall E259

Interested in working for NASA? Come hear Dr. Alexander Tessler speak about student opportunities at NASA. Dr. Alexander Tessler (PhD in Applied and Computational Mechanics, UCLA, 1979) has been employed by NASA Langley Research Center since 1991, and prior to that, he worked in the U.S. aircraft industry and in Army research. He has also served as adjunct professor at Northeastern University, Old Dominion University, George Washington University, and University of Virginia. During his tenure at NASA, Dr. Tessler has supervised student research and participated in joint research projects with numerous students, many of which were undergraduates. Dr. Tessler will present an overview of current engineering and scientific programs in the areas of structures and materials for aeronautics and space applications. Dr. Tessler will also discuss his experience of working at NASA, conducting research with students, and student internships and fellowships and other current opportunities for students at NASA. Question and answer session will follow.
