Electronic Data Storage Backup

Policy Manager: Chief Information Security Officer

POLICY STATEMENT
In order to protect institutional data against loss or destruction, it is required that such data be created and stored within the system of record utilizing an Information Technology (IT) approved data storage device (e.g. storage area network space, a shared or home directory). All contracted service providers, personnel and students that establish or create electronic data outside of the IT storage service shall define, document, and implement a backup procedure. Department Heads will assume the role of data trustee for their department's data and will appoint a data steward and manager.

REASON FOR POLICY
Augusta University maintains a large and growing body of data stored exclusively in electronic form. Data is critical to the operation of the enterprise, and it is clear that the enterprise could suffer significant loss should an important set of data be permanently lost. The policy is intended to ensure the integrity, availability, and confidentiality of electronically maintained data, including but not limited to confidential, sensitive, or personally identifiable information, and that Augusta University business units are able to resume operation in the event of any incident that causes data loss, equipment failure, inadvertent user error, fire, flood, vandalism, etc.

AFFECTED STAKEHOLDERS
Indicate all entities and persons within the Enterprise that are affected by this policy:

☐ Alumni ☒ Faculty ☒ Graduate Students ☒ Health Professional Students
☒ Staff ☒ Undergraduate Students ☒ Vendors/Contractors ☐ Visitors
☐ Other:

DEFINITIONS
Refer to the Augusta University Cybersecurity Charter Policy for applicable definitions.

PROCESS & PROCEDURES
IT provides various types of electronic storage space for faculty, staff, and students. Daily backups are performed using an enterprise data backup solution that includes off-site storage.

The following file storage areas are available:

- PRIVATE - Your private file storage area. This space is for documents only. No programs or license applications should be stored in this area.
- SHARE - Every department has a folder in which its members can share and collaborate on their data files. Like the PRIVATE area, program files are not permitted in this storage area.

- RESEARCH DATA - Many researchers require access to large capacity, secure storage for their research data. Additional research storage may be allocated upon request.
- BOX - Box is a Secure file sharing and collaboration system that is delivered through a strategic partnership between Augusta University and Box.

Special procedures related to Box storage:

- Confidential and regulated data (Student records, Protected Health Information, etc.) may be stored within Box if there is a legitimate business need.
- Enterprise owned devices must be encrypted if they utilize the data synchronization capabilities of Box to store confidential/regulated data.
- Confidential and regulated data shall be restricted to those who have a legitimate business need to know the information using access controls available through Box including username and passwords.
- Links that do not require authentication should never be used to grant someone access to confidential or regulated data.
- Anyone who wishes to use a third-party cloud application that interfaces with Box must receive prior approval through the IT procurement process.
- Box storage is to **be used for legitimate** University business purposes only.

Contact the IT Service Desk at 706-721-4000 for questions relating to electronic storage space.
